Senate Schedules Hearings On Survivor Benefits After Appeal From President

The Senate Finance Committee opens hearings 4 June on the \$590 million Survivor Benefits bill which has been dormant since it was approved by the House—almost a year ago.

The Committee's action was scheduled shortly after President Eisenhower made a personal appeal for the passage of nearly a score of administration bills, including the survivor benefits measure and other career incentive legislation.

Top Defense leaders will lead off as witnesses in favor of the plan to place all military personnel under contributory Social Security.

They also will support other features of the bill which call for increased bene-

fits for 185,000 Service widows, dependent children and parents.

Compensation for widows is boosted from the present high of \$87 per month to amounts ranging from \$112 to \$242.

Thousands of future survivors also will benefit from the plan, which provides sweeping changes in compensation payments provided families of military personnel who die on active duty or from service-connected causes after leaving active duty.

The VA compensation indemnity paid to widows under the terms of the bill is based on a flat base of \$112, plus 12 per cent of the basic pay of the deceased member. That is, the widow of a corporal would receive \$112 per month plus 12 per cent of a corporal's basic pay. The widow of a brigadier general would re-

—Continued on page 11

More Homes Loom, Also Higher Rents

Top developments in the military family housing picture this week brought both good and bad news.

The Senate passed the 1956 Housing Act Amendments. This was good news because the legislation authorizes an extension of the Capehart plan under which the Services currently are building thousands of new family housing units. The bill also authorizes the construction of 200,000 more units and increases the limitations on size.

Bad news came in the form of a Supreme Court ruling which could increase rents for 53,000 Service families.

In a 5 to 4 decision, the high court announced that Congress has given the States power to tax military housing projects built by private interests on

World-Wide PX Conference Sets Morale Goal; It Wants "No Rich Uncles Or Poor Relations"

NEW YORK CITY

The first world-wide exchange conference in a decade has just been completed here. Over 100 officers and key civilian personnel representing every major domestic and overseas Army and Air Force command and the Army Technical Services, together with the five A&AFES regional officers and their staffs met at the Hotel Sheraton-McAlpin with Maj. Gen. H. L. Peckham, USA, Chief, Army and Air Force Exchange Service and his staff.

Maj. Gen. Peckham

The primary purpose of the conference was to discuss the new world-wide fiscal integration of all Army and Air Force Exchanges directed by D/A Circular No. 60-1/AFL 147-2, 13 April 1956 which called for "uniformity and business-like coordination of operating policies and fiscal

controls; a strong flexible exchange service operated along commercial lines and responsive to command and logistic requirements; substantially uniform exchange services and prices and within each service equitable welfare benefits to servicemen, wherever stationed."

In his opening address, General Peckham called this new program of fiscal integration "a recognition by the Departments of the Army and the Air Force of an evolutionary process which has been going on for some time... the acceptance of a basically simple concept—and that is that military personnel are entitled to the same standards of exchange service; the same benefits; the same privileges—no matter where they are stationed."

In addition to fiscal matters, the introduction of plans which may lead to an eventual world-wide civilian career program for exchange employees was covered at length.

Brig. Gen. E. B. Gallant, USAF Deputy Chief, A&AFES called for the use of management techniques to reach the new objectives. Col. H. H. Shaller, USA, Director of Operations, Hq. A&AFES detailed assistance in merchandising, training, display and food operation which he

—Continued on next page

MACH BUSTER—Brig. Gen. J. S. Holtner, USAF, left, Commander of the Air Force Flight Test Center, Edwards AF Base, Calif., examines a "Mach Buster" certificate presented to Bill Holden, right, after a recent supersonic flight in a North American TF-86 at Edwards. The flight, piloted by General Holtner, took place in order to better acquaint Mr. Holden with the test pilot role he portrays in the movie "Toward the Unknown." Some of the flight testing activities of the Air Research and Development Command are illustrated in the forthcoming film.

R&D In Services Told In Reports

Research and development activities in the Armed Forces have been much in the news during recent weeks, with discussions and controversies at the Pentagon and on Capitol Hill directed at current programs in all the Services.

The heightened interest in the vital field of R&D makes particularly timely the following on-site stories covered and developed during the past week by members of THE JOURNAL staff across the Nation.

Air Force Secretary Donald A. Quarles told of a reassessment of the Defense R&D program in an appearance before the Armed Forces Communications & Electronics Assn. in Boston, Mass.—Page 2.

The Boston sessions of the AFCEA also heard Service representatives report on R&D problems; Association members, for their part, raised problems, also, as reported in coverage of a forum—Page 26.

In Utah, the Air Research and Development Command showed for the first time how it is conducting intriguing research tests in Project SMART, which seeks to secure greater safety for aircrewmembers forced to eject from high-speed aircraft.—Page 3.

An account of how missile research may someday help speed mail and provide other peacetime applications was provided to the Aviation Writers Association in California by Mr. Hall Hibbard, noted missile expert.—Page 2.

How the National Advisory Committee on Aeronautics is speeding intercontinental ballistic missile R&D at the Ames Laboratory, Moffett Field, Calif., is the subject of a special on-site story which tells of Mach 20 tests.—Page 9.

Our blimps soon may be packing a new punch as a result of research and development programs aimed at counteracting the growing Soviet submarine threat.—Page 11.

REVISED AUGMENTATION BILL DUE

Chairman Paul J. Kilday (D-Tex) was due to call an executive session of his House Armed Services subcommittee on 1 June to work out further details of the Regular Officer Augmentation bill.

Congressman Kilday told THE JOURNAL he hopes his group will have a new draft of the legislation ready next week. The measure provides for the integration of thousands of Reservists into the Regular ranks of the four Services.

Navy and Marine Corps augmentation programs will be continued at approximately their present pace, Pentagon officials here stated.

For a detailed breakdown of the planned integration by rank in the Army and Air Force see pages 25 and 8, respectively.

Peacetime Benefits From Military Research Stressed by Lockheed Missile Div. Chief

MOFFETT FIELD, CALIF.

MISSILE research being conducted for the military services eventually will be put to peacetime uses transporting mail and high priority freight, Hall Hibbard, General Manager of the Lockheed Missile Systems Division, told members of the Aviation Writers Association during a visit here 27 May.

"I think that very often," Mr. Hibbard said, "an important fact about military development goes unheralded—that in almost all cases, except those of actual armament, military inventions find their way into peacetime civilian use."

"A good example is the wing of the World War II Lockheed P-38 fighter, which found its way into civilian life as the wing of the Constellation transport. The Connie's wing is the identical article, in much larger scale, that we developed to meet the purely military need for the P-38."

Carrying the parallel a step further into the missile field, Mr. Hibbard revealed that the straight, stubby, sharp-edge wing of Lockheeds new high performance F-104 Starfighter "came straight from a missile we have been flying for some time."

Furthermore, Mr. Hibbard predicted that the F-104 wing, the erstwhile missile wing, will be used on a commercial transport plane that will cruise at supersonic speeds. (Here he could have been making a forecast based on Lockheed's forthcoming KCX jet tanker and its transport version.)

The speaker foresaw mail being flashed

across continents and oceans by missiles. He also expressed a belief that we will see freight rockets for premium cargo. "Slow freight," he said, "will go by prop-jet at rates that will be lower than any of today's methods, but if you're in a hurry for something from New York, or if you want to send an iron lung to the Klondike, it will take only minutes."

Mr. Hibbard also saw peacetime civilian uses for satellites, such as the Vanguard we will launch during the International Geophysical Year. For example, a satellite would provide an ideal reference point visible to radar when stars are not visible, positioned to be exactly where we want them instead of where they appear to be. Satellites, he said, also would permit vast strides in communications by reflecting signals and would make it possible to beam programs any place in the world—"there will be no TV-dark areas." They also would make possible "absolutely dependable" weather forecasts.

"The missile people," Mr. Hibbard declared, "due to the simplifying of our problem with no humans aboard, may perfect the fully effective application of nuclear, solar, and other energy well before it is done on land or in conventional aircraft."

"I believe that, as a nation, we are buying a crash program of learning, of battering back the perimeters of our knowledge, and of wrenching basic laws and relationships of the universe."

"This basic knowledge can be applied as well to our civilization as to its defenses."

Air R&D Gets New Pentagon Study

CRITICISM AT FORUM, PAGE 26

BOSTON, MASS.

The Air Force has launched a "detailed study" of its entire R&D effort, but feels that in the meantime the 1957 budget "should give us the necessary resources to carry on in the research and development area, at least until we can get a firmer grip on the whole program."

This candid comment was made here at a banquet meeting of the Armed Forces Communications and Electronics Association on 25 May by Air Force Secretary Donald A. Quarles.

The former Assistant Defense Secretary for R&D conceded that problems relating to the adequacy of the Air Force R&D program represent "one of the more controversial areas in present-day Air Force planning."

"Measured by all earlier standards," he said, "our present research and development level is certainly very high." Then he added: "Measured in relation to our present-day problems, and perhaps in relation to our competition, there are well informed people who criticize it as being inadequate."

Mr. Quarles noted that in addition to about \$600 million a year in direct Air Force R&D appropriations, "we are using several times this amount in procurement funds for the production and test of development models and the like, all of which of course contribute to the research and development program as a whole."

"This means, however, that the program must be gauged in relation to the total expenditure. Whether this is adequate and whether it is sound in relation to the research and development potential of the country are matters of judgment."

Mr. Quarles gave no specific answer to the R&D controversy. He said that "we recognize that we must be highly selective in the projects we carry out because there simply isn't enough money or talent in the country to do everything that imaginative people can propose, nor even all of the things that would appear to be completely justified."

"We are, however, fully covering the priority items such for example as the strategic missile programs."

The Secretary commented that "I frankly do not feel that we yet have the

full answer to the question, but I can assure you that it is receiving earnest study."

Cites Manpower As Urgent AF Problem

Mr. Quarles took advantage of the noted audience of industrial leaders to carry forward his campaign to win new career incentives for military personnel. He told the Hotel Statler audience that "the inability to retain our skilled people, particularly those trained in operating and maintaining our complex electronic equipment, is perhaps the most serious problem confronting the Air Force and this in spite of the fact that we have been striving to find a better solution for it by providing pay and other benefits more nearly commensurate with the market."

He said that the Services presently are at a disadvantage in competing for skilled manpower "because industry is better able to pay our trained men what they are worth."

Capt. Hull Presides, Services Represented

Capt. David R. Hull, USN-Ret., now with the Raytheon Corporation, was Convention Chairman and presided at the banquet session.

National President George W. Bailey of the AFCEA was moderator for the forum meetings. The master of ceremonies at the keynote luncheon on 24 May was Mr. Gardiner G. Greene, president of the Boston Chapter.

Mr. Greene introduced RAdm. John Snackenber, USN, 1st Naval District Commandant; Maj. Gen. Raymond C. Maude, USAF, head of the Cambridge, Mass., Research Center; RAdm. R. L. Raney, USCG, 1st Coast Guard District Commander, and Lt. Col. G. J. Glemm, USA, of the Boston Army Base, who represented the First Army Commander.

The Forum on Research on Thursday was to have brought participation of Lt. Gen. James M. Gavin, USA, Chief of Research and Development and Lt. Gen. Donald L. Putt, USAF, Deputy Chief of Staff, Development. They were forced to remain in Washington, however, for Congressional appearance. The Army was represented instead by Brig. Gen.

PRESIDENT GREETES PX GLOBAL CONFERENCE

The following telegram was received from the White House by Maj. Gen. H. L. Peckham, USA, Chief, Army and Air Force Exchange Service at the opening of the World-Wide Exchange Conference and read to all conferees: "As the Army and Air Force Exchange Service holds its first World-Wide Conference of Exchange Officers since World War II, please extend my greetings to all participants."

"I understand that the purpose of the conference is to explore means of improving management practices in order to improve the service to Army and Air Force personnel who patronize exchange retail and food and service outlets in this country and in overseas areas."

"The Exchange Service makes a major contribution to the morale of the men and women in the Armed Forces. I shall be much interested in the outcome of your conference, and I extend to all of you my best wishes for its success."

PX Sessions Seek World-Wide Standards

From first page—

will make available to oversea exchanges. He also reviewed the progress made domestically in merchandising improvements.

Mr. Benjamin H. Crosby, Hq. A&AFES Comptroller introduced the subject of fiscal integration and the means by which this new program will be implemented when it becomes effective 30 June 1956. His Deputy, Mr. Kai Simonsen explored the means by which automation can be applied to exchange activities and he outlined some of the advances made in automatic computing and electronic data processing.

The conference had an "old home week" flavor when Maj. Gen. E. H. White, USAF, Commander, Sheppard AFB, Tex., and the former Chief of A&AFES addressed the gathering which included his former Deputy, Col. Wilbur M. Skidmore, USA, presently Chief of the European Exchange Service. General White recapped some of his experiences in exchange operations since leaving the Exchange Service. He also called for continued vigorous public relations programming to assure greater understanding and support of the exchange privilege.

Cdr. T. B. Purvis, USN, Executive Officer of the U. S. Navy's Ship's Store Office, addressed the conference outlining the operation of Navy resale activities. The Exchange portions of the courses at the Quartermaster School, Ft. Lee, Va., and the Supply Services Officers Course, Warren AFB, Wyo., were covered by Lt. Col. T. M. Bond, USA, and Mrs. Shirley Knochenmuss respectively.

The Board of Directors, Army and Air Force Exchange and Motion Picture Services were represented by Col. William P. Thorington, Office of Director of Transportation, DCS/Materiel, USAF; Col. Charles R. Frederick, Executive Secretary and Col. William A. Curtin, Deputy Executive Secretary. Colonel Frederick addressed the conferees on the new role played by the Board of Directors contrasted with the recently dissolved Joint Welfare Board.

No Rich Uncles

The new fiscal integration program was hailed as a mobilization of the fiscal resources of all exchanges, world-wide to assure that "there will be no rich uncles or poor relations among our exchange systems."

Conferees expressed keen interest in the world-wide civilian career program plans noting that it would assure a wise and equitable distribution of existing executive and supervisory talent as well as providing

Brig. Gen. Gallant

Earle F. Cook of the Signal Corps Laboratories at Ft. Monmouth, N. J., and the Air Force by Maj. Gen. Herbert B. Thatcher, USAF, Assistant Deputy C-of-S, Development. Navy representative was RAdm. Rawson Bennett, USN, Chief of Naval Research.

Industry spokesman for the Research Forum was Mr. Helge Holst, Treasurer of the Arthur D. Little, Inc., research organization.

an incentive for qualified young men to enter the system and work their way up to top exchange positions either in this country or abroad.

A full morning session was devoted to oversea procurement matters and led by Mr. Frank Moore, Director of Procurement. Interest in this subject ran high, and it was necessary to schedule several overtime open forums to continue the discussions past the scheduled hours.

The meaning of world-wide career programming was explored by Mr. Henry A. Soubirac, recently appointed Director of Personnel of Hq. A&AFES, who stated that he felt a world-wide career program would embrace a world-wide exchange wage and salary plan as well as world-wide administrative procedures.

Mr. Ryan Leads Conference

Mr. John J. Ryan, Chief of Technical Information who was also Conference Director, delivered a talk on Public Relations, noting that good public relations is a management responsibility and calling for an integrated approach to public relations programs and a greater interchange of information among all domestic and oversea exchanges. This theme of continued improved public relations was touched upon also by General White in his talk and by Generals Peckham and Gallant and several other speakers.

The state tax picture was outlined for the domestic representatives by Mr. John Brauch, Deputy General Counsel, Hq. A&AFES.

Oversea Problems Aired

A feature of the conference was a panel discussion of oversea exchange problems monitored by Mr. Gene Montanye, Executive Director of Hq. A&AFES who also acted as master of ceremonies throughout the conference. This panel featured talks by Col. Wilbur M. Skidmore, Chief, EES; Col. William Ela, Exchange Officer, Japan Central Exchange and Mr. Robert Cotton and Mr. Rudolph Matthaues of AFEX; Lt. Col. Joseph Hamlin, RYCOM Exchange Officer; Maj. John Dominick, Exchange Officer, Pacific Army and Air Force Exchange Service (Hawaii) and Maj. Robert L. Howard of the Iceland Central Exchange.

General Peckham, who referred to himself as "an old soldier who may not be with you at the next world-wide conference" received a standing ovation from the conferees at the dinner meeting following an informal recapitulation of his forty years of service. In his closing remarks he stated that he felt that the conference had been very successful. He termed fiscal integration as major development in the progress toward uniformly high standards of service to military personnel the world over.

Colonel McFarland Cited

A surprise feature of the closing conference luncheon was the presentation by Brig. Gen. Gallant of the Major General E. H. White trophy to Col. Jack McFarland, San Antonio Regional Officer. This trophy, named after the former A&AFES Chief, is presented to the domestic regional office each six months with the best record for management improvements in selected fields of activity. Colonel McFarland accepted the trophy on behalf of the personnel of his office. This represented the first win for San Antonio and the third time the trophy has been presented.

NAVY'S DR. DOYLE

VAdm. Austin K. Doyle, USN, Chief of Naval Air Training, Pensacola, Florida, will be awarded the honorary degree of Doctor of Engineering at the Michigan College of Mining and Technology Commencement ceremonies, on Sunday, 3 June. He delivered the principal address at Michigan Tech's annual Honors Convocation held on 1 June.

More Homes—High Rents

From first page—

Government lands.

This means that rents at 159 Wherry housing projects could be boosted by whatever taxes local and State Governments impose.

It could mean, additionally, however, that Congress may take hurry-up action to authorize funds for the Services to buy up the old Wherry projects, thus removing the threat of increased rents.

AUTHORITY TO PURCHASE existing Wherry projects outright and assign them as public quarters already has been approved by the House in the current Military Public Works bill, but no move has been made to appropriate funds for the purpose.

The House Banking and Currency Committee is considering a somewhat similar amendment to the Housing Act which would permit the Services to buy Wherry projects in areas where they are building Capehart homes.

The Senate Armed Services Committee, still working on the Military Public Works bill, also will give consideration to the Wherry-purchase proposal.

By boosting Wherry rentals, the Supreme Court decision could persuade the President to ask Congress for necessary funds to carry out the authority contained in the military construction measure.

THE SUPREME COURT RULING affirmed an earlier decision by the Nebraska Supreme Court which upheld a \$10,000 county tax on an \$825,000 housing project at Offutt AFB designed to provide low-rent housing for AF personnel.

Citing for the majority, Justice Felix Frankfurter said Congress had used "general language" in the tax laws which indicated that "the States were to be permitted to tax private interests, like those of the petitioner, in housing projects located on areas subject to the Federal power of 'exclusive legislation.'" The opinion was supported by Chief Justice Earl Warren and Justices Hugo L. Black, Tom C. Clark and Sherman Minton.

Justice William O. Douglas asserted in a dissent, concurred in by Justices Stanley F. Reed, Harold H. Burton and John M. Harland, that Congress did not intend to have states tax projects designed to provide "clean, adequate and inexpensive housing" for military families.

HOMES—NOT HOVELS—GEN. LeMAY URGES

"I have never believed that Air Force officers and men should be forced to live as second-class citizens. They are too important to the security of this nation to be expected to accept substandard conditions. Certainly, one of the most important factors in making Air Force life attractive is insuring the individual that his family will have a decent house in which to live."

With this statement, General Curtis E. LeMay, USAF, C-in-C of SAC, went before the House Committee on Banking and Currency on 24 May to plead for legislation which would permit construction of thousands of military family housing units.

General LeMay said that SAC will get about 9500 units under Public Law 345 (Capehart Housing) before that authority expires on 30 September. He said SAC needs about 13,900 additional houses for officers, 22,800 for NCO's and 18,500 for lower grade airmen.

The SAC C-in-C stressed the need for lower grade housing. "If we are to expect these men to stay in the service and assume greater responsibility," he said, "it is necessary to provide them with a decent place to live. It seems that every time I activate a new base, the housing rentals in the nearby communities jump far above their true value. Since my married lower grade airmen draw only \$50-\$70 a month in quarters allowances, they are being forced to live generally in quarters that could only be called hovels."

Although testifying primarily on the need for more housing, General LeMay did not lose the opportunity in this Congressional appearance to stress the need for increased pay to retain top notch specialists and technicians.

Earlier this month, General LeMay had testified at length on the pay situation in his appearance before the Symington Subcommittee which is looking into U. S. airpower in comparison to Soviet air strength.

Capitol observers say that at the present time there is no more influential military man in presenting facts on career attractiveness than General LeMay. His remarks concerning the need for housing for lower grade airmen, it was stated, may bring action in that area.

ARDC Unveils New Supersonic Sled to Test Escape Devices; Project SMART Seeks Supersonic Ejector Safety For Fliers

HURRICANE MESA, UTAH

PROJECT SMART, the Air Force's new supersonic sled designed to increase the reliability of high performance aircraft escape systems, was given its first public viewing to press representatives here 25 May.

Visitors were permitted to witness Test Run No. 39, the third in a series of 10 tests designed to determine the structural limitations of the North American F-86 seat ejection system in the transonic region.

The rocket-propelled aluminum sled, mounted on nickel alloy steel "slippers" which grip the steel "crane" rails, used only the last 3,340 feet of the 12,000 foot track for this test. The seat was ejected 1,080 feet before the end of the track. The seat and dummy pilot (nicknamed "Hurricane Sam") were catapulted high in the air and over the end of the mesa falling 1,500 feet to the floor below.

In this test, however, the parachute of neither the dummy pilot nor the ejection seat opened, both plummeting to the ground. The parachute is normally opened by a timing device actuated by the pulling of a cable when the ejection seat leaves the pilot. This latter action is brought about by a cartridge which blows the seat belt. In this instance, either the timer could have failed or it could have failed to pull the parachute pin all the way out. A live, conscious pilot could also have opened the 'chute manually. The pilot's 'chute was the Air Force's standard E5A pack. The 'chute on the seat is an experimental model and designed merely to salvage the seat for future use—it is not used in aircraft. This latter experimental seat 'chute is new in design and has had numerous failures in past runs.

Mr. E. A. Gardner, vice president and general manager of the Coleman Engineering Co., which built and operates the track, told the visitors, however, that this was the first pilot's 'chute failure in the 39 runs the sled has made, except that on one previous run the dummy's arms got tangled in the shrouds and fouled the 'chute.

The operators of the track, however, considered Test Run No. 39 successful, inasmuch as this particular run was for the purpose of testing the structural limitations of the seat ejection system and not particularly the subsequent flight of the dummy.

SUBSEQUENT TESTS WILL STUDY the downward ejection system of the Lockheed F-104. In this case the pilot's compartment will be catapulted off the end of the mesa and the downward ejection system actuated in the air.

Project SMART (Supersonic Military

DUMMY PILOT and seat have just been ejected from the supersonic sled. At a predetermined time a cartridge will separate the pilot and seat and 'chutes will be released to float them to the foot of the mesa.

Air Research Track) was designed, engineered, built and is operated by the Coleman Engineering Co., of Los Angeles, under the supervision of the Air Research and Development Command. President of the firm is Theodore C. Coleman, who was one of the organizers of Northrop Aircraft, Inc., and its vice president for seven years. Although a relatively small company, it has, within the past five

HURRICANE MESA showing the 2½ mile supersonic track. Starting end of the track is at the right and the muzzle end is at the left. Seat and dummy pilot are ejected about 1,000 feet before the end of the track. Seat and pilot go upward and forward so that they fall approximately 1500 feet over the cliff end of the mesa. Up the side of the mesa may be seen the 18,000 foot roadway which had to be built before work on the track could be undertaken. Caterpillar tractors and bulldozers chewed into the side of the mesa, completing the roadway with its 10 per cent average gradient in just 55 days.

'Copters Get Greater Role In Rescue Duty, As Fixed Wing Craft Face Reduction

(Last week's issue of THE JOURNAL contained a comprehensive report on activities of the Air Rescue Service by Brig. Gen. Thomas J. Du Bose, USAF, Commander, in connection with a 10th anniversary celebration on 29 May. On 28 May, the Pentagon released the following statement on reorganization of ARS).

Technological advances and years of daily experience have brought about a new concept of effective search and rescue service and a major reorganization in the Air Force Air Rescue Service, General Nathan F. Twining announced this week.

The reorganization places greater emphasis upon helicopters, with the general area and route search concept employing large, self-sufficient units at relatively few bases within the United States giving way to a program of versatile air rescue detachments dispersed throughout the country.

HELICOPTERS AT 55 BASES in the United States and at designated overseas

bases will assure a more readily available rescue effort everywhere.

Four Air Rescue Service Group Headquarters and nine squadrons will be replaced in the new program. The use of the additional helicopters in the Air Rescue program will reduce the number of fixed wing aircraft presently utilized.

THE COST of the operation will be reduced through the smaller number of personnel needed to operate the helicopters and the cheaper cost of helicopter operation.

Helicopters also will supplant crash-rescue boats in the new program, greatly reducing the cost of that type of operation while at the same time increasing efficiency.

The overseas Air Rescue Service units will remain relatively unchanged because of the greater distances and the more complex operational requirements involved in rescue work.

U. S. Army

3d Army Day Rooms Get New Decor

The Third Army hopes to redecorate all its day rooms within the next three years.

The project, which has the backing of Lt. Gen. Thomas F. Hickey, USA, Third Army Command, will be financed by non-appropriated funds.

To implement the program, three enlisted men who were interior decorators in civilian life were called upon to furnish and redecorate four day rooms at Ft. Bragg, N. C. Soldiers were then asked which type best suited them, and which points of each type they favored or disliked. Results of the questionnaires were tabulated and suggestions of the men incorporated in further planning.

USMA Graduation

Officials at the U. S. Military Academy this week made available the names of cadets who will be graduated 5 June but placed a Sunday, 3 June, release date on publication.

This means that THE JOURNAL must wait until its next issue to publish, as is our annual custom, the names of "Sons of the Service."

At the same time, it was announced this week that 107 cadets have told of plans to be married following graduation; 51 marriages will take place at the Academy, beginning at 2 p. m. on 5 June.

Next week's issue of THE JOURNAL and subsequent numbers in June will report on the USMA weddings, as well as those at the other Service Academies.

June week activities at USMA begin Friday, 1 June, with a retreat review at 5:30 p. m. and continue through to the graduation on 5 June, at 10 a. m.

Col. Barschdorf Will Move To Top Vicksburg Post

Col. Milton P. Barschdorf, CE, USA, Assistant Division Engineer, Lower Mississippi Valley Division, and Secretary, Mississippi River Commission, Vicksburg, Miss., has been named to succeed Col. Thomas B. Simpson, CE, USA, as District Engineer, Corps of Engineers, at Vicksburg.

Colonel Barschdorf, who will be relieved by Col. Carl H. Bronn, CE, USA, reporting from overseas, assumes his new duties on 16 July. Colonel Simpson reports to the Army War College, Carlisle Barracks, Pa.

Shift Army Generals

MAJ. GEN. VERDI B. BARNES, USA, Deputy Chief of the Military Assistance Advisory Group, Spain, will report in July to the 4th Armored Division, Ft. Hood, Tex. Col. Chester A. Dahlen, Deputy C-of-S, Fourth Army, Ft. Sam Houston, Tex. will succeed General Barnes.

MAJ. GEN. FRANK N. ROBERTS, C-of-S, Allied Forces Southern Europe, Naples, Italy, has been assigned to Headquarters, California Military District, Presidio of San Francisco, California, with station at Fort MacArthur, Calif.

MAJ. GEN. JOSEPH S. BRADLEY, USA, Medical Holding Detachment, Walter Reed Army Hospital, Washington, D. C., retired on 31 May for medical reasons.

BRIG. GEN. DAVID L. VAN SYCKLE, USA, Director of Production Planning, Office of Defense Advisor, U. S. Mission to North Atlantic Treaty Organization and Europe Regional Organization, will retire 30 June after more than 31 years service.

BRIG. GEN. WILLIAM E. HOUSE, USA, Assistant Chief of Ordnance for Manpower, Washington, D. C., also will retire on 30 June after more than 31 years service.

BRIG. GEN. ERNEST A. BARLOW, USA, Deputy CG of The Infantry Center, Ft. Benning, Ga., retired on 31 May after more than 30 years service.

MEMORIAL FUND HONORS GENERAL HESS

Maj. Gen. Emmett J. Bean, USA, Commanding General of the Army Finance Center, has announced that \$2,100 has been donated to the Indiana Division, American Cancer Society, from military and civilian personnel to establish a memorial fund in memory of Maj. Gen. John B. Hess, USA, who died 10 April shortly after he retired as Army Chief of Finance.

Known as the "General John B. Hess Cancer Memorial Fund," 40 per cent of the amount contributed will be used in support of the Little Red Door at City Hospital, 20 per cent will help support state research and educational projects in universities, hospitals and various other state institutions, and the balance will be allocated to the general fund of the American Cancer Society and is available to the national organization to support the search for a cure for cancer.

In presenting the donation to the Cancer Society, General Bean was informed that it was the largest memorial gift ever received by the Indiana Division.

Col. Maret To 1st Army

Col. Raymond Maret, MC, USA, Chief of Medicine at the Ft. Hood, Tex., Station Hospital, has departed for assignment at First Army Headquarters, Governors Island, N. Y.

Before reporting to his new assignment, the Colonel will attend a three months course in Advances in Internal Medicine. Only six doctors throughout the U. S. have been selected to attend this course.

New PIO At Brooke

Lt. Col. Tom O. Mathews, USA, former chief of the Radio and Television Branch in the Department of the Army Public Information Division in Washington, has been assigned to Brooke Army Medical Center, Ft. Sam Houston, Tex., as Public Information Officer.

He succeeds Maj. Edwin S. Marsh, USA, who will attend the hospital administration course at the Army Medical Service School.

Army Plans Expanded Pay Voucher Test

The military Pay Voucher System, which has been undergoing limited testing at Ft. Dix, N. J., since last December, will be put into effect at other Army posts 1 July.

Approximately 51,000 troops will be affected at the 1st Infantry Division and Post at Ft. Riley, Kans.; III Corps at Ft. Hood, Tex.; 1st Armored Division at Ft. Polk, La.; post personnel at Ft. Sam Houston, Tex.; post personnel at Ft. Myer, Va.; Ft. McNair, Washington, D. C., and Cameron Station, Va.

Payments to personnel assigned to these organizations will be made in accordance with provisions contained in "Test Manual, Proposed Military Pay System Procedure for U. S. Army Personnel." Personnel trained at the Army Finance School will be used as cadre personnel and will be transferred to implement the expanded tests.

The proposed Military Pay Voucher system is the result of a study by Finance Corps and Adjutant General personnel to correct major faults of the present system which involves recording of all the service member's financial data for six months on one military pay record. It was designed to provide greater ac-

curacy in the payment of Army personnel, and at the same time reduce the number of personnel and the amount of equipment necessary to administer the Army pay system. Particular emphasis is being directed in these tests to the payment of the Army under field conditions.

The new system is based on the use of two principal forms called Military Pay Vouchers and Requests for Pay Action. These would replace the present Military Pay Record card and other transfer forms, if the system is eventually adopted.

Should the proposed system be adopted, the service member would receive a copy of his Military Pay Voucher each time he is paid, enabling him to see all items of pay and allowance as well as any collections and deductions for the month. He will know exactly how his pay was computed. Consequently, any pay misunderstandings and resulting claims could be settled promptly in the unit personnel office where a complete record of his pay status would be available. When the soldier is transferred, his file record is forwarded, so that he will have this, in addition to his personal copy of the Military Pay Voucher available for prompt payment at his new station.

New Device Allows Army NIKE & AA Units To "Kill" Simulated Planes & Missiles

Army NIKE and anti-aircraft batteries soon will be able to "shoot down" non-existent enemy planes and guided missiles.

These feats will be possible as a newly developed anti-aircraft radar target simulator, designated 15D2, begins to hit the field.

The new device, developed for the Army Participation Group of the Naval Special Devices Center, Office of Naval Research, Port Washington, L. I., N. Y., already has been put through engineer tests at the Aberdeen Proving Ground, Md., and user tests at Ft. Bliss, Tex.

The Continental Army Command has passed favorably on the target simulator. It is reported that high-ranking Army officials who have seen the 15D2 in operation are "highly enthusiastic." Army procurement officials have given the Army Group authority to negotiate contracts for 50 units. It is anticipated that negotiations for the radar target simulators will be completed in June. Each unit will cost about \$50,000.

Although the Army's initial order will be for 50 of the devices, the total requirement is for 166 of the simulators. While it is not possible to give a precise date for delivery of the simulators to field units, Army officials predict that the first group will be put into the hands of the troops in calendar year 1957.

By making use of the on-site radar trainers, instructors will be able to inject synthetic targets, such as planes, guided missiles and ships at sea, without interfering with the normal operations of radar sets.

As the instructor inserts a problem into the complex electronic mechanism—it is possible to make use of six simulated targets, in any combination, simultaneously—it is recorded on a radar scope. The scope gives the actual characteristics of planes, missiles or ships just as though they were really being picked up by the radar set. The set records range, speed and elevation, etc. In this way a whole battery can be trained at one time.

If a man sets the correct course, a kill is scored automatically. The instructor can complicate varied problems by artificially jamming a radar set.

Army officials predict that the simulators will pay for themselves within a year since there no longer will be a necessity to call on the Air Force for "surprise attacks." In addition, it is pointed out, anti-aircraft batteries will be able to be trained around-the-clock.

In the past, the Army also trained its battery crews by tracking and attempting to "destroy" commercial aircraft. In practice, however, this type of training has little value, once an individual

memorizes the airline schedules in his area.

The new device will furnish instruction in:

- Recognition and handling of a number of aircraft types;
- Speed and accuracy drill for individuals, as well as for battery crews as a team;
- Target recognition after interference; and,
- IFF (identification: friend or foe)

interrogation and response to electronic signals from aircraft.

Each of the devices, which, in effect, is an attachment to the M-33 Tracking Radar; the M-33 Acquisition Radar, or the AN/TPS-5d Search Radar, will be carried in an M-22 trailer.

The Army will furnish the ordnance trailers to the contractor who is selected to produce the target simulators.

In addition to the anti-aircraft target simulator, the Army plans adoption of a second type for use in artillery work. The artillery target simulator still must undergo engineer tests at Aberdeen and user tests at Ft. Bliss. This type simulates mortar and artillery shells in flight,

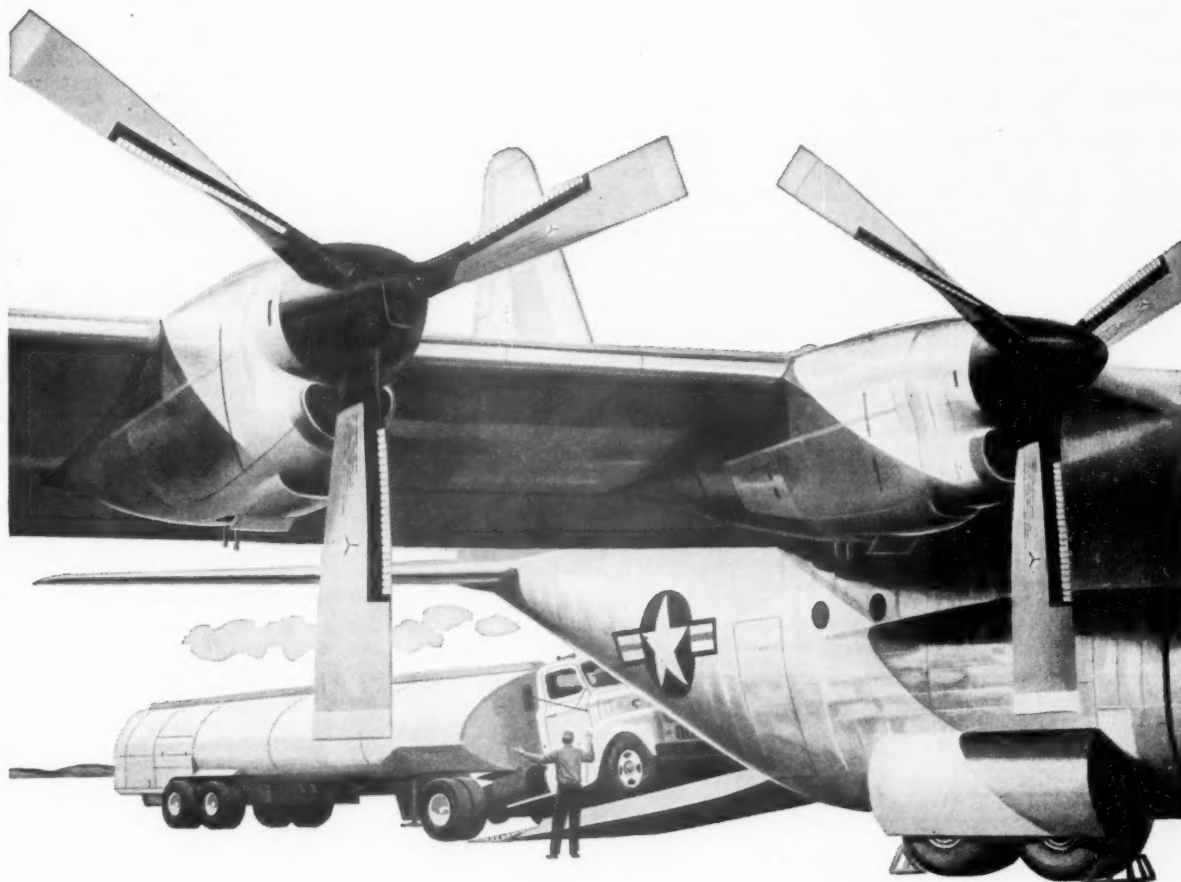

Army Navy Air Force Journal 5
2 June 1956 (Vol. 93, P. 1229)

as well as ground targets such as tanks and trucks.

Although the field artillery simulator still must be evaluated, officers freely predict its eventual adoption. They point out that it is merely a modified version of the anti-aircraft type and that no stumbling blocks are evident.

Ultimately, the Army hopes to procure 130 of the field artillery problem simulators.

Prototype models of the target simulators were manufactured by Aircraft Armaments Inc., Cockeysville, Md.

Air Force Chooses Aeroproducts Propellers FOR LOCKHEED C-130 HERCULES

USAF's first Turbo-Prop transport—the versatile C-130 Hercules—now is being equipped with the proved team of Aeroproducts Propellers and Allison Turbo-Prop engines.

A program of extensive research and testing of Aeroproducts turbo-propellers for the Hercules was conducted by the Propeller Laboratory at Wright-Patterson Air Force Base. In a period of five months, four qualification tests were made with a total of over 900 hours of running time.

Aeroproducts Propellers were chosen on the basis of these tests and of enthusiastic reports by pilots of MATS' 1700th Test Squadron who recently completed a successful flight evaluation program with Allison-powered aircraft.

In an eleven-month period, the 1700th accumulated 3000 hours of flight test time on two Convair YC-131C aircraft powered with YT56 engines and

Aeroproducts Propellers. Within one day each of the two aircraft was flown 23 hours and 10 minutes out of the 24, and in the final four months of the program each aircraft was flown an average of eight hours per day. During this evaluation program, the propeller overhaul time was raised to 1000 hours. This program effectively demonstrated the unmatched dependability of the Allison-Aeroproducts Turbo-Prop package.

The Aeroproducts Propeller blade is of hollow steel construction, having solid steel ribs integral with the thrust side of the blade. No filler material is required in the hollow cavity. It is heat-treated to C30-C36 hardness, with

an average tensile strength of 150,000 psi—providing the maximum abrasion resistance attainable on present-day propeller blades.

Allison Turbo-Prop power gives the Lockheed C-130 the ability to fly cargo faster and at less cost than any other combat transport.

U. S. Navy and U. S. Marine Corps

Capt. Spahr Commands Newport Naval Schools

Capt. Otto W. Spahr, Jr., USN, Commanding Officer, USS Yosemite, has been named to succeed Capt. William B. Perkins, USN, as Commander, Naval Schools, Newport, R. I.

Captain Perkins assumes command of the oiler USS Allagash.

Plan Opens College Chance To Sailors

Between 50 and 100 petty officers will have an opportunity to get college educations at Government expense under a new Navy plan.

The Navy Enlisted Advanced School Program provides a maximum of four years' college training for qualified enlisted men. Those picked for the program—which goes into effect immediately—will be required to serve two years' active duty for each year the Navy sends them to school.

PO's picked for the program from those with at least three years of service will be required to sign up for two six-year hitches. After signing on the dotted line for the first time, PO's will be ordered to a civilian college for two years.

This will be followed by approximately four years of duty with an operational unit. After reenlisting for the second six-year tour, EM will be sent to college for two years of advanced training.

Details are contained in BuPers Instruction 1510.69, dated 26 April.

Capt. Kossler Heads Subs

Capt. Herman J. Kossler, USN, Commanding Officer, USS Sanborn, has assumed command of Submarine Squadron Two, based at New London, Conn.

He succeeds Capt. Charles M. Henderson, USN, who takes command of the Pearl Harbor Submarine Base.

Capitol O.K. Assured For Promotion Bill Which Will Give More Power To Sec'y.

Navy Secretary Charles S. Thomas is given broader power in the field of officer promotions by legislation approved this week by the Senate Armed Services Committee.

The plan (HR 404)—which abolishes sea duty qualifications—won House approval last February. The Senate was expected to pass the measure and send it to the White House as THE JOURNAL went to press.

Professional qualifications which examining boards must look for in officers up for promotion will be decided in the future by the Navy Secretary, under the terms of the legislation. At present, examining boards set their own criteria.

When Secretary Thomas sent the proposal to the Congress he said his decision to do away with sea duty qualifications is based on the fact that "many officers are assigned to duties exclusively in some particular specialty and have no opportunity to become qualified to perform all duties at sea because of the increasing specialization of duties in the Navy."

He said "it has become difficult" to comply with the requirement that an officer must be qualified to perform all the duties at sea of the grade to which he is promoted.

Basically, the bill provides that Navy ensigns and Marine Corps second lieutenants shall not be promoted permanently until they have demonstrated to an examining board such mental, moral and professional qualifications as the Secretary may prescribe.

Officers above the grade of ensign and second lieutenant, but below flag and general officer grade, would not be pro-

Senate OKs Navy Warrants

The Senate has confirmed the nominations of the following Navy warrant officers for permanent appointment to the grade indicated in the U.S. Navy:

Charles F. Pape, CWO, W-4.
Samuel O. Grayson, CWO, W-4.
Vincent Kozlowski, Jr., CWO, W-3.

Career Marine NCO's Have Officer Chance

The Marine Corps is accepting applications from career NCO's for appointments to permanent unrestricted officer rank.

In order to be eligible, an NCO must be serving in three-stripe grade or higher and have at least three years' active duty, but no more than eight.

Interested Non-Com's should submit applications through their commanding officers, who will convene boards made up of at least three officers to interview each applicant.

The CO's board will make recommendations based on the NCO's officer potential and characteristics. All applications must be received at HQMC by 1 September.

NCO's who are chosen will be sent to a 10-week course starting in January 1957, at the Marine Corps Schools, Quantico, Va. Those who successfully complete the course will be appointed to 2d lieutenant's rank and assigned to the Basic School for officer training.

Details are contained in Marine Corps Order 1040.3.

Honor RAdm. Hogan—Other Navy Notes

RADM. BARTHOLOMEW W. HOGAN, MC, USN, Navy Surgeon General, is slated to receive an honorary degree of Doctor of Science at Marquette University, Milwaukee, Wisc., on 3 June.

THE SECOND ANNUAL REUNION of officers and men of the USS President Adams, under the chairmanship of RAdm. Frank H. Dean, USN-Ret., will be held over the Labor Day weekend in New York City. The exact location has not yet been determined. For further details write to Albert Filippelli, 1546 Kimball St., Brooklyn, N. Y.

THE FIRST SUSTAINED FLIGHT during the dark winter period at Little America was successfully completed on 14 May at the Air Operating Facility, there. The plane, a UC-1 DeHaviland "Otter," piloted by Lt. Paul R. Streich, USN, remained aloft for four hours and six minutes evaluating electronic equipment and aircraft performance. Lt. (jg) Wesley H. Seay, Jr., USN, was the plane's co-pilot. Enlisted crew members were: AC1st Class John A. Cox, USN; PH2d Class Chester M. Stevens, Jr., USN, and AB3d Class Chester E. Thomas, USN.

ESTABLISHMENT OF THE RATING of Signalman (SM) as a general service rating has been approved. At the same

time, the emergency service ratings Quartermaster Q (Quartermaster) and Quartermaster S (Signalman) were disestablished. These rating changes will be accomplished by future directives. Men in these specialties will continue to be advanced in their current rating and will not be shifted to the new rates until specific instructions are issued, the Navy said.

THE NAVY HAS SELECTED 272 NROTC graduates for Staff Corps appointments in 1956. The majority will begin their tours of obligated service this Summer.

THE 1956 REGISTER of Commissioned and Warrant Officers of the United States Navy and Marine Corps is available from the Superintendent of Documents, U. S. Government Printing Office, Washington 25, D. C., for \$6.00 (paper-covered edition). Also on sale is the Reserve Register for \$5.25.

CAPT. SYLVESTER F. WILLIAMS, MC, USN, has been appointed Navy Member of the National Committee on Radiation Protection of the U. S. Department of Commerce, National Bureau of Standards. He replaces RAdm. Charles F. Behrens, MC, USN, who has retired from the naval service.

First Flight Nurse Attends Graduation

The First Flight Nurse graduated by the Air Corps in 1943 was in attendance 25 May when her 3229th successor received gold wings at the Air Force School of Aviation Medicine branch at Gunter AFB, Ala.

When former Lt. Geraldine F. Dishroon was graduated from the old Air Evacuation School at Bowman Field, Ky., on 18 Feb. 1943, Brig. Gen. David N. W. Grant, former Air Surgeon, pinned his own flight wings on her when it was realized that no insignia for her new aerial rating had been created.

Recently, when Col. John R. McGraw, Acting Commandant of the School, flew from his headquarters at Randolph AFB, Tex., to the Gunter branch for the graduation of an earlier class by the School, he suggested it would be appropriate if the first Flight Nurse graduated could attend the next graduation ceremony.

However, no one knew who the first Flight Nurse was. Bowman Field's Flight Nurse records had been mislaid. However, George N. Dubina, command historian of the Air University, dug up the information that the first Flight Nurse was Lieutenant Dishroon. A newspaper in the nurse's hometown of Tulsa did a bit of research and finally came up with the news that Lieutenant Dishroon is now married to Col. W. W. Brier, USAF, of the 36th Air Division at Davis Monthan AFB, Ariz.

AIRMEN ALLIES—Air Vice Marshal C. E. Kay, left, Chief of Air Staff, Royal New Zealand Air Force, is pictured above with Brig. Gen. L. C. Coddington, USAF, Commander, McConnell AFB, Kans., during a recent stopover in Wichita.

FREE BASEBALL

The management of the Yankees, Giants and Dodgers have announced that their gates will again be opened for free admission to baseball games for uniformed personnel of the Armed Forces for all home games.

The Yankees will admit free of charge all service personnel in uniform via the Servicemen's Gate, Gate 5A, 157th Street, to available seats in Yankee Stadium, 161st Street and River Avenue in the Bronx.

The Giants will admit free all personnel in uniform via the Press Gate at the Polo Grounds, 155th Street and 8th Avenue New York City.

The Dodgers will admit free all uniformed service personnel to the unreserved seat section in the grandstand on a first-come first-served basis, at Ebbets Field, Brooklyn.

ASK BAQ FORGIVENESS FOR AF WOMEN

The Pentagon has asked Congress to let 1800 female officers of the Air Force keep a half-million dollars which they received erroneously.

During the three-year period ending 12 April 1954, the AF paid out about \$500,000 in basic allowance for quarters to women members of the Air Force whose husbands also were members of the Armed Forces.

The women received the BAQ payments if they and their husbands were stationed at the same or adjacent installations, provided family-type quarters were not available and the base commander ruled that it was not in the best interests of the service to assign the women to available single-type quarters.

The Comptroller General came along a little later and said such payments were not valid unless single-type quarters were not available to the women. Now, the Government wants its money back.

The Air Force says it wasn't the fault of the ladies: "They accepted in good faith payments made by finance officers who were also acting in accordance with the AF regulations in effect at the time," and repayment will result in hardships which "will cause a serious morale problem."

The legislation urged by the Pentagon would authorize the Government to forgive and forget.

now - - maybe you can qualify

Serviceman? Veteran? Civil Service employee assigned to the Armed Forces? Then you're eligible to apply for the special hospitalization program of the Armed Forces Medical Aid Association.

A non-profit organization originally set up for full-time servicemen only, AFMAA has

now broadened its requirements. As always, membership gives top coverage for members and families, whether in civilian or government institutions.

Write today for details on this all-round protection—available to you at cost.

General Stone Urges Permanent Status For 50 Per Cent Of Active Duty Officers

At least 50 per cent of the active officers of the Air Force "should have permanent status," Maj. Gen. William S. Stone, USAF, Director of AF Personnel Planning, has told the Kilday House Armed Services Subcommittee.

As written, the Regular Officer Augmentation bill provides for a Regular force of 40 per cent in both the Air Force and Army by 1963. Any further increases in the two Services would be up to the President.

In considering the proposal that the Air Force be authorized 50 per cent of its current commissioned strength in Regulars, General Stone said there are two factors worth noting.

He reminded the subcommittee that the Congress "tacitly agreed" with the 50-50 ratio when it enacted Public Law 604 in July 1950. The 1950 act authorized a strength of 27,500 Regular AF officers, which was 50 per cent of the planned and budgeted officer strength at that time.

The second factor, he noted, is that the Regular strength which is proposed in the Augmentation bill is "slightly less than the officer strength required for an Air Force of 70 Groups and a total personnel strength of 502,000." Thus, any future cutbacks in AF strength would

not curtail the permanent careers of the officers the Air Force hopes to attract into Regular service through the Augmentation legislation.

General Stone said the Air Force plans to use age 30 as the maximum age for the appointment of an individual with no prior active service and that this basic age may be increased by the amount of active Federal commissioned service performed since age 21. "Thus, most appointees will be able to complete 30 years of active Federal commissioned service prior to age 60," he said, "a more stringent requirement than the completion of 25 years prior to age 60, as provided in this bill."

He added that special exception will be made for what is expected to be a very small number of civilian specialists who may apply for initial appointment up to age 35.

Present plans call for the Air Force to integrate approximately 24,000 officers through the grade of lieutenant colonel during the first two years after the new law goes into effect. It is expected that about 50 will be integrated in the grade of lieutenant colonel, 2,600 in the grade of major, 13,000 in the grade of captain and the remaining 8,350 in the grades of first and second lieutenant.

Air Force Completes FY'56 Appointments As 260 Master Sgts. Win Regular W.O. Slots

The Air Force has completed its fiscal '56 Regular W-1 warrant officer appointment program with designation of 260 master sergeants, whose names are listed below. In September, the Air Force had announced 150 other appointments.

Next group to be named will be in September, according to present plans.

The Air Force said that some of the new appointments are being made in AFSC's other than those for which application was made. This is because of the fact that certain AFSC's will be abolished in the near future.

Those not selected will be considered by Boards through 30 September 1957.

Andrews Gets Ready For New Mission

LIKE the person who wears many hats to fit the occasion, so Andrews AFB, Md., houses or is responsible to many divergent organizations and commands in fulfilling its ever-changing role in the Air Force master scheme. At present, Andrews supports 25 units, 12 major ones, plus four headquarters within its 4,500-acre confines.

The fifth and latest headquarters to join the Andrews' "family" will be Air Research and Development Command (ARDC), following an announcement of its removal from Baltimore by Secretary of the Air Force Donald A. Quarles. No definite date has yet been set for the arrival of Hq ARDC, a move which will affect more than 2,000 people.

HEADQUARTERS ALREADY LOCATED on the base include Military Air Transport Service (MATS), its subsidiaries Airways and Air Communications Service (AACS) and Air Weather Service (AWS), plus the 85th Air Division, a unit of Air Defense Command (ADC). This group contributes everything from research and development of Air Force electronic and mechanical miracles to a global airline, a worldwide "weather bureau" and defense of the skies over the Middle Atlantic states.

Aside from these, Andrews counts many smaller organizations. There is the 95th Fighter Interceptor Squadron which flies F-86D Sabrejets and is directly responsible for the air defense of Washington, D. C. The 95th FIS comes under the jurisdiction of Hq 85th Air Division.

Hq AACS has two subordinate organizations stationed on Andrews, 2045th AACS Group and 1823rd AACS Group, while the 9th Weather Group, under Hq AWS, is also housed here. The District of Columbia Air National Guard, the 113th Bomb Wing and the 113th Fighter Interceptor Squadron, further broadens Andrews' area of activity. A Continental Air Command (CONAC) organization, the 2259th Air Reserve Flying Center, continues the list.

OTHER VARIED AIR FORCE units operating directly from Andrews are the 4716th Ground Observer Squadron; Detachment 1, 1732d Air Transport Squadron, used to evacuate medical patients from all parts of the world; a flight of the 4602d Air Intelligence Service Squadron; and the soon-to-arrive 1361st Photo Squadron which will move to the base from Alexandria, Va. To sustain the pattern, Andrews also supports two Army units which are key links in the defense of the nation's capital. These are the 75th AAA Missile Battalion, equipped with NIKE, and the 601st AAA Gun Battalion, equipped with 20 mm guns.

Supporting all of these organizations and acting in a "housekeeping" capacity is the 1401st Air Base Wing. It is the hub around which all of the others revolve. In addition, the Wing runs and has command jurisdiction of the base.

Aside from its regular components which include a helicopter flight, the 1401st Air Base Wing is responsible for monitoring and maintaining Combat Readiness Training for a majority of the pilots assigned in the Washington,

D. C.-Baltimore area. This "CRT", as it is called, enables Air Force personnel, serving in desk jobs, to maintain flying proficiency. Thus at any time they are reassigned, they will be current and immediately available for flying duty. Approximately 250 aircraft, half of which are jets, aid in carrying out this mission.

A POSSIBLE FUTURE CHORE for Andrews could be that of handling all flying activities attached to Headquarters Command, Bolling Air Force Base, D. C. Already newspaper reports predict this switch with all aircraft operations to phase out at Bolling. If this materializes, it will strengthen Andrews' claim as one of the busiest Air Force bases.

The base has already logged more than 17,400 takeoffs and landings during one 30-day period, an indication of the business at hand.

The present Base and Wing Commander is Colonel Lewis B. Meng, USAF, acting in that capacity until the arrival of the new Commander, Col. William T. Smith, USAF. Colonel Smith is to assume his duties in late summer, after relinquishing command of the 1804th AACS Wing in Alaska. Now 42, Colonel Smith was graduated from the U. S. Military Academy in 1939, has attended the Air War College, is a Command Pilot and among his decorations are the Air Medal and the Army Commendation Medal.

The construction being carried on at Andrews echoes the diversified activities. Slated for completion in late 1957 is a new 250-bed hospital which will be among the finest in the Air Force. This structure, built on a 500-bed frame for future expansion, will utilize a staff of nearly 200.

LATE THIS FALL, a new Base Chapel and reconstruction of the Officers Club will be finished. The Chapel will seat 300, while the Officers Club replaces the one destroyed by fire in 1955. Among other installations listed for Andrews are 280 family-type housing units programmed under the Capehart Act, and additional hangar and ramp space.

The base's rapid growth and expansion to 10,000 military and civilian personnel plus buildings have been accomplished in only 15 years. The first troops arrived on what was then known as Camp Springs Army Air Field in 1943, two years after the purchase of land and the necessary construction were authorized. Since that time, Continental Air Command Headquarters, Strategic Air Command Headquarters and Headquarters Command have, at one time or another, been situated on Andrews.

Add those to the organizations already enumerated, and the statement that "It's either been, is or will be here" takes on an ironic meaning. Andrews' unique and multiplex role makes it loom larger and larger each year in the overall Air Force pattern.

MAJ. GEN. R. C. LINDSAY, USAF, left, Director of Plans, Headquarters USAF, is greeted by **L. R. Grimes**, right, chairman of the Montgomery County Board of Revenue, and **Brig. Gen. J. H. Wallace, USAF**, deputy commander for education, Air University, as he arrived at Maxwell AFB, Ala., to deliver an address to a joint civic club luncheon. The Lions Club of Montgomery, Ala., was the host club.

NACA Ames Lab Tests Missile Models At Twenty Times Speed of Sound

MOFFETT FIELD, CALIF.

The fastest flight speeds yet reached under laboratory test conditions—exceeding 10,000 miles per hour—have been accomplished at the Ames Aeronautical Laboratory, the National Advisory Committee for Aeronautics disclosed here 28 May at a meeting of the Aviation Writers' Association.

This figure is more than twice the speed reported for Aerojet General's Aerobee-Hi sounding rocket in use by the Air Force and Navy.

The record speed was set by a model fired from a newly-developed light gas gun. It was fired under conditions that reproduce at full scale the heat encountered by an Intercontinental Ballistic Missile (ICBM) as it descends through the earth's atmosphere near the end of its trajectory.

NACA, the Federal Government's principal scientific agency for aeronautical research, said the new gun which set the 10,000 mph record is the forerunner of a larger device which will fire up to 16,000 mph. The Ames light-gas gun is based on principles worked out at the New Mexico School of Mines where a "hydrogen gun" was developed during WW II.

NACA scientists have added technical improvements which substantially increase the gun's maximum performance and adapt it to aerodynamic research. Helium, another light gas, has been chosen as the working medium.

For test purposes, the gun can be fired into a pressurized tank filled with air at any pressure to simulate various altitudes. The tank can also be filled with gases other than air.

It is also possible to fire models from the high velocity light-gas gun head-on into a supersonic air stream generated in a special wind tunnel. In this way, the gun now in use can fire models in free flight at test mach numbers up to 20.

The larger gun soon to be built will be able to attain a mach number of 30.

THE NEW RESEARCH EQUIPMENT was developed to meet the need for reliable scientific information on the aerody-

amic design requirements for long-range ballistic missiles. It is expected that these missiles will fly at speeds between 10,000 and 15,000 mph and that they will return to the earth's atmosphere at these speeds. The slowest meteors enter the atmosphere at speeds only slightly greater than this and a missile will thus meet the same violent reaction with the air.

It was pointed out that relatively little has been known about aerodynamic heating at near-meteoric speeds. Even the air itself is physically changed by the enormous temperatures generated.

OF MAJOR SIGNIFICANCE is the fact that the Ames light-gas gun and its associated equipment now provide in the laboratory an accurate simulation of the actual speeds and temperatures as full-scale missile is expected to meet in flight. Convenient wind tunnels in their present form cannot reproduce these conditions and the light-gas gun thus represents a major extension of research capabilities.

"Very Important" Legislation. By including Service career incentive legislation in his list of "very important" measures which he would like to see enacted before this Congress adjourns, President Eisenhower reemphasizes the importance which he and the heads of the military services place upon these bills to strengthen National Security.

The impact which the wasteful turnover of personnel is having upon our defenses has been impressed further upon Congress and the American people by the release of testimony by General Curtis E. LeMay, USAF, Commander-in-Chief of the Air Force's Strategic Air Command. General LeMay, after telling Congress that Russia's rapid technological progress and accelerated build-up in long range jet bombers will give her the capability by 1960 of striking devastating blows upon this country, pointed out that we are not even in the position of being able to fully utilize the retaliatory force we have in being. Right now, the SAC chief declared, the equipment we have is only 78 percent effectively manned because of personnel shortages. General LeMay, while marshalling facts to show our lag in long range jet bombers, cited the personnel problem as SAC's number one shortage. While the General did not directly say so, it is evident that this situation will grow worse unless career incentives are made effective, for the average age of pilots in our career force is growing steadily older. The younger fliers who should be replacing them are leaving the Service for more attractive careers and better living conditions for themselves and their families in business and industry.

The needs embraced in the President's list of "very important" legislation (the White House announcement carefully refrained from labeling them as "must" bills) include such vital fields as assured medical and dental care for families, the availability of adequate family living quarters at home and abroad, and survivor benefits sufficiently substantial to relieve Service personnel of worry for the future of their wives and children if they should lose their lives in the Service.

Congress can act speedily upon the many measures now before it. No strong opposition to any of them is apparent; the delay seems to be due to scheduling and programming, rather than to disagreement. We hope the President's gentle and timely reminder will bring action.

Research in Safety. The Air Force's newly completed research facility, Project SMART (see story on page 3), holds enormous possibilities for progress in a most important field about which far too little is now known. Furthermore, as performance of military aircraft reaches higher and higher levels, the problem of successful emergency escape becomes increasingly complex.

Brig. Gen. Don D. Flickinger, USAF, commander of ARDC's Office of Scientific Research, points out that both humanitarian motives and the objectives of National Defense dictate two goals: 1) Increased reliability in high performance aircraft so that escape will seldom be necessary, and 2) Increased reliability in their escape systems so that success will attend their use in the vast majority of cases. Nevertheless, with military aircraft subject not only to the technical problems of high performance but also the hazards of war, escape will always be a problem.

The Hurricane Mesa supersonic track with its added feature of observing a free fall of more than 1500 feet offers new possibilities for research into this field. For example, it can go beyond the mechanical problems of the construction and operation of ejection systems and study the position the pilot himself should assume when

Avoiding all personal and political bias, its influence will be directed solely to the inculcation of sound military ideas, and to the elevation of the public service in all its departments."—From Vol. 1, No. 1, Army and Navy Journal, August 29, 1863.

SATURDAY, 2 JUNE 1956

he goes out. George Smith, test pilot for North American Aviation, who has bailed out of a jet at 780 miles an hour, emphasized this phase as particularly important.

Testing at SMART has merely begun. It will in the future go beyond current thinking and look into new ideas of escape. As General Flickinger points out "No possible immediate or long-range solution can be overlooked, no matter how unconventional the approach may seem."

"Special Trust and Confidence." Lt. Col. R. D. Heintz, jr., USMC, has written an article for the current issue of the *U. S. Naval Institute Proceedings* which should be required reading for policy makers in the Defense Department and each of the Armed Services.

Colonel Heintz wonders what has happened to the "Special Trust and Confidence" which is be-

stowed upon an officer by his commission, when in fact prestige has been diminishing and trust waning. He cites many startling examples: On board MSTs ships an officer cannot cash his check or pay for charges with it; furthermore Travelers' Cheques, good the world around, will not be cashed unless fingerprinted by the individual presenting them. At a major Marine Corps base, he says, when an officer applies for auto tags, they will not take his word that he has insurance—he is required to bring in his policy for inspection. He also reports that in European Army Exchanges an officer is required to present written evidence that the woman with him is his wife—his unsupported word is not enough. If an officer wants to cash a check at one of the largest Air Force Officers' Mess in Europe, Colonel Heintz says, he must complete a formidable form certifying, under penalty of disciplinary action, that he has enough money in the bank to cover it.

These are only a few examples. Colonel Heintz cites many others. He also offers a program for making "Special Trust and Confidence" more meaningful. Surely the situation he reports offers the Departments a fertile field in which they can do something to boost morale and make officers more willing to remain in the Services.

IN THE JOURNAL

10 Years Ago—Declaring that the responsibility of the United States toward the Philippines will not end with independence, Secretary of State Byrnes this week told Congress that "Military and Naval bases will be maintained by the United States in the Islands in agreement with the Government of the Philippines and certain garrisons of United States troops will be required."

50 Years Ago—In the Olympic games in Greece the Americans, who excelled in speed, won 75 prizes; the British, 39; the Swedes and Greeks each 28.

90 Years Ago—The present condition of the Indian is not much improved. The mining immigrants cross their hunting grounds by a dozen different routes, and drive away the game which furnishes them food, shelter, and clothing. The border men, as a rule, believe religiously that "no Indian has any rights which a white man is bound to respect," and shoot them down as remorselessly as though they were rattlesnakes. Is it strange that the Indian should revenge himself on those who have attacked or outraged him? Almost any race will fight when the maintenance of peace does not exempt it from unprovoked assault.

READERS' VIEWS

(Letters to the Editor must have author's name and address, but name will be omitted on publication if writer so states. Longer letters may be extracted for publication.)

"Civilianize" Pay?

Editor, THE JOURNAL:

It was with disgust and dismay that I noted in your 21 April issue (p. 1040) that the Defense Department is preparing to back a "competitive pay structure" for officers to keep them from being lured away by industry.

The foundations of the world's military pay systems are being attacked by this radical and, I believe, unwise proposal. Military pay has always been closely allied with rank or rating and prestige or status. This winning combination has been the basis of American military pay ever since the founding of the Republic.

Now, we find the Air Force in general and the SAC in particular wanting to completely "civilianize" pay by putting the individual's services and the rewards therefrom out on a supply-and-demand "highest bidder" relationship. Worse still we find Defense backing this plan. Admittedly, the nation had no choice but to reward doctors and dentists, and hazardous duty pay is an accepted part of our pay system.

But now we are being faced with a legislative package that will put

the premium on the man's value as a specialist and not his leadership and service. And, beyond this, there are even proposals for "hardship" pay (Indeed, the Air Force must be getting pretty soft to have to ask for hardship pay!)

The disciplinary and inequity problems that would result from a private out-earning the sergeant and a lieutenant more than a major are only part of the objections to this plan. Imagine, if you will, the difficulty of administration. In my own Navy Supply Corps, I can just see the mad rush to get designated an "Electronic Supply Officer" or whatever other title was most lucrative in the pay table.

Pay raises must surely come as long as the civilian inflation continues its creeping and unabated ways. But they should be general pay raises based on rank and service. If the Air Force's technician problem is so overpowering, let them look at the Navy's system of technical ratings and fast promotion commensurate with accomplishment in same as the acceptable way out in accordance with proven military traditions. Certainly a system that will try direct competition with

civilian industry is economically unsound.
A SUPPLY CORPS "GENERALIST," USN.

Seeks Missing Daughter

Editor, THE JOURNAL:

President Eisenhower has suggested that I write to you for help in trying to find our missing daughter, Mrs. Horace J. Emerson, jr., who had mentioned that she would like to become a member of the Armed Forces and go overseas, before her disappearance from her home in Baltimore, Md., 22 May 1953.

Our only daughter, Mrs. Emerson, left her husband and two small children. Her husband died 11 July 1954. My husband and I have had the children ever since their mother left. Janet was eight years old in May and still cries for her mother, and Dorice was four years old in April.

Our daughter's two brothers were in the Army in WW II. If she has joined the Service and if you can print this letter, perhaps she will see it and know we all love her and that her children need her, as my husband and I are up in years.

Thanking you ever so much, I am,
MRS. WILLIAM EARL BEAM
1514 Reisterstown Rd.,
Baltimore 8, Md.

Lighter Blimps Will Carry Bigger Anti-Sub K.O. Punch, LTA Missiles Are Seen Certain

A POWERFUL new combination of weapons soon may be added to the Navy's airarm as blimps begin to carry guided missiles.

Although the Navy declines to affirm or deny that such a move is under consideration, lighter-than-air experts readily concede the feasibility of firing missiles from blimps. It is known that the Navy continually fires rockets from its LTA craft.

In light of warnings by high-ranking Navy officials of a constant buildup of Soviet naval power—with emphasis on its submarine forces—it is inconceivable that the Navy has not experimented with a blimp-missile combination—particularly with the Fairchild air-to-underwater missile, "Petrel."

At the time of the Japanese attack on Pearl Harbor, Germany was operating a submarine fleet about one-seventh as large as Russia's present combat-ready undersea fleet. On 7 Dec. 1941, the U.S. Navy had only 10 military airships in operation and only six of these were large enough for sea patrol duties. Allied shipping took a severe pounding.

The Navy began an intensified buildup of its airship fleet in a move to combat the submarine menace. As airships were added to the anti-submarine force, the number of merchantmen sunk off the Atlantic Coast took a nose-dive. In 1942, the Navy was operating four to 13 airships off the Atlantic Coast, during which period 454 ships were destroyed by German U-boats; the sinkings dropped to 65 in 1943 when the Navy had between 17 and 53 blimps on station. With 56 to 68 LTA's hovering off the Coast in 1944, only eight merchantmen went down; in 1945, the final three ships were sunk as 48 to 53 Navy blimps toured the Atlantic skies.

Busy WW II Service Recalled

At peak strength, Navy airships were patrolling three million square miles off the Atlantic, Pacific and Mediterranean Coasts. During the War, airships escorted 89,000 surface ships—50,000 of them in waters known to be infested with U-boats—without the loss of a single merchantman. In performing this task, blimps made 55,900 operational flights, spending 550,000 hours in the air. Airships assigned to Fleet units established a record "availability factor" for all military aircraft, remaining on the flight line 87.9 per cent of the time.

Despite their cumbersome appearance and seeming vulnerability, only one WW II blimp was lost as a result of enemy action. In July 1943, the K-74, operating in the Florida Straits, was making a pointblank run on an enemy U-boat when her bomb release gear failed. When the U-boat skipper realized that his ship was no longer in danger, he surfaced and shot down the blimp with the loss of only one man. All other crew members were rescued by Americans.

Since WW II, the Navy has been constantly at work endeavoring to improve the blimp's potency.

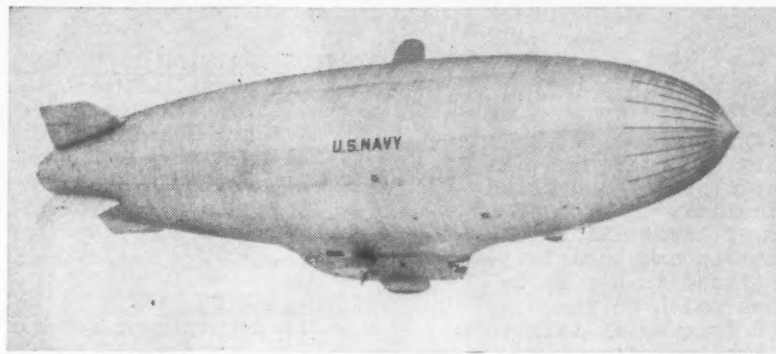

Better LTA's In Service

Today's LTA's are keeping pace with submarine improvements. Airships now in operation have improved range and endurance, advanced techniques for in-flight refueling, provisioning and transfer of personnel, better crew accommodations, more accurate electronic gear, improved navigational and communications equipment, an auto-pilot and many other advanced features.

A Navy ZPG-2 established the sustained flight-without-refueling record in 1954. The LTA craft, with Capt. Marion E. Eppes, USN, at the helm, took off from NAS Lakehurst, N. J., on 17 May, and landed at Key West, Fla., 25 May, remaining aloft for 200.2 hours, or eight days and eight hours.

Captain Eppes won the coveted Harmon Trophy for 1955 for this achievement.

A new "breakthrough" in technology promises to increase the blimp endurance factor even further. Soon to hit

EARLY WARNING BLIMP — One of the Navy's newest blimps, the ZPG-2W, is shown in flight. The 343-foot craft, a modified version of the ZPG-2, has been redesigned to serve as an airborne early warning station. It is equipped with the latest detection gear and an auto-pilot. The ship, built by Goodyear, is powered by two Wright R-1300-2A engines.

the Fleet is a new lightweight dacron fabric for airship envelopes. The use of this new material will result in a weight saving of more than 1,000 pounds. The fabric is stronger than the present cotton-impregnated-with-neoprene gas bag. The new envelope, developed for the Navy by the General Development Corp., Elkton, Md., will lower the cost of operating blimps since it has a built-in decreased diffusion rate, that is, less helium is able to escape from the envelope. The Navy plans to use the new envelope on all of its new blimps.

The reduced weight of the envelope means that LTA craft will be able to take off with more fuel or an added weapons load, remaining aloft for longer periods of time.

Stephen-Douglas Co., Inc., Los Angeles, Calif., recently designed new control surfaces and a surface control system for airships which are currently undergoing tests at the Airship Test and Development Department, NAS Lakehurst, N. J. The Lakehurst station, which is comparable to the Naval Air Test Center at Patuxent River, Md., for heavier-than-air craft, is continuously working on various projects to improve and develop LTA equipment and designs.

Nine Blimp Types In Service

At present, the Navy has nine different types of blimps in service. Here's a rundown on the six major types:

ZSG-2 and ZSG-3 — These types were formerly known as the ZP2K and ZP3K and called "K" ships. The envelope volume is about 550,000 cubic feet. These two types carry crews of 10 men and are used for training, ASW and search missions. They were the Navy's major WW II blimps. They are being phased out of the LTA fleet as new types are introduced.

ZSG-4 — Formerly known as the ZP4K, this airship uses the same size envelope as the ZSG-3, but carries a new car with improved electronic equipment. It berths eight men and is used for ASW and search work.

ZS2G-1 — This type was previously designated the ZP5K. Its envelope volume is 670,000 cubic feet. This design, initiated in 1952, carries an eight-man crew and the latest ASW equipment for patrol and escort missions.

ZPG-2 — Introduced around 1950, this ship was formerly known as the ZP2N, or "Nan" ship. Its envelope volume is slightly over 1,000,000 cubic feet. This LTA craft is specifically designed for long-endurance flights.

ZPG-2W — A modified version of the ZPG-2, it was just completed this year. It is 343 feet long and carries a control car made of an aluminum alloy and balsa wood. The control car has two decks. All the operating stations are in the lower compartment, while the crew's quarters and galley are upstairs. This model carries 20 officers and men. It has a retractable tricycle landing gear and is powered by two Wright

R-1300 A, seven cylinder engines. It can make speeds up to 70 knots.

Other models are in the "classified" stage.

Down to a force of about 50 ships from its WW II peak strength of about 130, the Navy and its prime producer of blimps—the Goodyear Aircraft Corp., Akron, Ohio, are geared to swing into full production in the event of another war.

In all, there are approximately 200 officers and 1,600 enlisted men assigned to LTA duty. During WW II, officer strength was near 1,500 and enlisted strength about 7,600.

In the future, however, smaller numbers of enlisted men will have to be

assigned to blimp duty. A recently developed "mechanical mule," which already is being used at NAS Lakehurst, can ground handle a blimp, employing only seven men. During WW II, the docking and undocking of an airship required about 70 men.

The Navy's only Overhaul and Repair Department for airships is located at Lakehurst. All models go through heavy maintenance there and Lakehurst's ship facilities and personnel have the capability of completely rebuilding an airship.

Lakehurst Squadron

In addition to the test and repair work, two airship squadrons are stationed at Lakehurst—Airship Squadron Three (ZP-3) flying the ZPG-2, and the first Aircraft Early Warning Airship Squadron (ZW-1)—commissioned in December 1955—and flying ZPG-2 blimps.

Three Reserve squadrons also are stationed at Lakehurst.

Other Airship squadrons stationed on the East Coast are:

ZP-1 and ZP-4 located at Weeksville, N. C., flying ZSG-4 blimps; ZP-2 located at Glynnco, Ga., and operating ZS2G-1 LTA's.

ZX-11 is an operational development squadron under Commander, Operational Development Force, and is located at Key West, Fla., where airship tactics are developed for later use by blimp squadrons.

The only airship training squadron is ZTU at Glynnco, Ga. This group flies ZSG-3 and ZSG-4 airships.

In addition to Reserve squadrons at Lakehurst, others are located at Santa Ana and Oakland, Calif., and at Akron, Ohio.

Senate Group Approves Change In Navy Running Mate System For Staff Corps

A new method for assigning running mates to lieutenants (jg) in the Navy staff corps is provided in legislation approved by the Senate Armed Services Committee.

The measure was expected to see quick Senate passage and go to the White House this week. It previously was approved by the House.

The legislation is designed to correct disadvantages now suffered by officers appointed to the staff corps while serving in the grade of ensign. When these officers reach the grade of Lt(jg) they are assigned running mates in accordance with the Officer Personnel Act of 1947.

Under this authority, a formula known as the fanning process is used to distribute staff corps officers at approximately regular intervals throughout the entire line list of Lt(jg) having dates of rank in the same calendar year.

For example, if there were 200 line Lt(jg) with dates of rank in the same calendar year and 20 staff corps officers with dates of rank in that same calendar year, the number one staff corps officer of this group would have assigned

as his line running mate the line officer who is number 10 on the line lineal list and the last staff corps officer of the group would be assigned the line officer who is number 200 on the lineal list of this group.

Under these circumstances, the Committee said, it is possible that the senior staff corps officer of this group may have stood number one in his graduating class at the Naval Academy. By the present fanning process he now has as his line running mate his classmate who stood number 10, and if the last staff corps officer of this group stood number 20 in his graduating class he now has as his running mate his classmate who stood number 200 at the Academy.

The legislation would achieve its purpose by excluding Naval Academy graduates and officers appointed ensigns in the Regular Navy from NROTC programs from the fanning provisions of the OPA. These officers then would be assigned running mates when they are promoted to Lt(jg) in accordance with their position in order of merit upon graduation.

Slate Start For Benefit Hearings

From first page—

ceive \$112 per month plus 12 per cent of a BG's basic pay.

After the first of the year, all Armed Forces personnel would be placed under contributory Social Security—with maximum pay deductions of \$84 per year. This program will cost the Government \$112 million annually, with Servicemen paying a like amount.

The \$10,000 free insurance program is terminated under the plan.

The present six months' death gratuity is changed to provide a minimum payment of \$800 and a maximum payment of \$3,000. This compares with a present minimum of \$468 and a present maximum of \$6,857.

Federal Employees' Compensation Act benefits which now go to Reservists on

active duty would be discontinued for those coming on active duty after passage of the bill. All survivors of Reservists and Regulars would be paid on the same basis in the future.

Administration of survivor benefits also is simplified by the plan which makes it possible for a survivor to file only one application. At present, survivors must file application for such benefits with at least four Government agencies and often more.

Portal-to-portal coverage is provided for all Reservists while in a travel status to or from active duty for training or inactive-duty training.

Hearings on the bill tentatively are scheduled for five days beginning on 4 June. Defense witnesses will be followed by representatives of military and veterans' organizations and associations.

memo

APPOINTMENT OF FRED SEATON, White House Deputy Assistant, to be Secretary of Interior, will remove from the Presidential staff a skilled "trouble shooter," particularly in Defense Department matters. A former Assistant Defense Secretary (Public Information and Legislative Liaison), Mr. Seaton continued in his White House post to keep a close watch on the Pentagon, was called upon frequently to give his advice on sensitive public information problems. One example: how to counteract Congressional criticism of current military programs. IT'S WIDELY BELIEVED that the Administration's decision in recent months to ease up a bit on release of information about guided missiles came partly as a result of Mr. Seaton's recommendation that the public wants assurance that bold steps are being taken to insure U.S. supremacy. Thus, it became possible for Pentagon officials to discuss missile matters that had been previously barred.

THE CORDINER COMMITTEE on compensation for technicians and specialists probably will hold its first meeting within the next two weeks. Preliminary planning was discussed at a conference last week between President Cordiner of the General Electric Co. and Assistant SecDef Burgess. Announcement is expected momentarily of the military membership of the Committee.

SERVICE CHIEFS WERE GRATEFUL for the new appeal from the President for action on the Survivor Benefits Bill. Fear remains, however, that the House-passed bill will become lost in the adjournment shuffle, although chances of enactment now are said to be at least 50-50 as a result of the Chief Executive's reiterated appeal for its passage.

ARMY AVIATORS WILL BE PLEASED by General Hutton's hard-hitting speech to the Aviation Writers Assn. in California (Page 28). Reports from the meeting indicate that the Army's Aviation Center Commander scored impressively with his presentation to the nation's top aviation reporters. Army fliers will take an increasing role in activities of aviation groups throughout the nation in order to win greater understanding for Army Aviation. THEY WILL EMPHASIZE, as did General Hutton, that the Army wants no revival of its own Air Corps, but will insist that all of its branches which can employ aircraft effectively be given adequate organic aircraft to get the job done.

THE NAVY'S 60,000-TON CARRIERS will be a final command test for four-stripe skippers on the way to flag rank. Capt. Roy L. Johnson, USN, USS Forrestal C.O., already tabbed for a second star, will succeed RAdm. Charles D. Griffin, USN, as Director, Long Range Objective Group, Office of the CNO. Admiral Griffin moves to the JCS organization. Capt. William E. Ellis, USN, CofS, Commander, Operational Development Force, Norfolk, Va., gets the Forrestal.

A VOWEL LOSS has created a problem for Army logisticians. The office of the Deputy CofS for Logistics formerly was known as DEPLOY. That was fine. But now, there's less stress on the "Deputy" aspect, and more on the "Staff" status. Army elocutionists are invited to pronounce DCSLOG.

SERVICE TRAINING PROGRAMS related to Communist "brainwashing" techniques and POW responsibilities will be reviewed by the Defense Advisory Committee on Prisoners of War at Pentagon meetings next week. Among other matters to be discussed is the widely publicized and controversial Air Force indoctrination and interrogation course at Stead AFB, Nev.

INTER-SERVICE HARMONY likely will be fostered by the appointment of Mr. Garrison Norton, a USNR captain, to succeed Asst. Navy Sec'y. James H. Smith, jr., who is resigning after filling the post since July 1953. Mr. Norton, 56, Assistant Secretary of State from 1947 to 1949, lately has been a research and development consultant to Air Force Secretary Quarles. "AN ENERGETIC AND FORCEFUL" champion of air and weapon technology, as described in an official farewell statement by Navy Sec'y. Thomas, Mr. Smith was never hesitant to express his feelings on the need for adequate support for naval airpower. Some of his statements are known to have been upsetting to the other Services, notably the Air Force. Coming from the Air Force, Mr. Norton undoubtedly will try—at least at the outset—to calm the controversial waters surrounding strategic naval airpower.

ALCAN HIGHWAY ACCIDENTS are causing a problem in the Services. In numerous instances, military families travelling to Alaska by auto have become involved in accidents or mechanical failures and have found themselves without enough money to pay for repairs or continue by commercial means. TRANSPORTATION OFFICERS are being told to warn Alcan Highway travellers of potential pitfalls along the way.

AIR FORCE DENTISTS are being told to maintain close liaison with flight surgeons. The Pentagon has learned of instances where air crewmen have received some drugs from the dentist which are contra-indicated while flying without this information being passed along to the flight surgeon.

THE PROMOTION LIST HUMP in the Navy—mostly in the rank of commander—won't be ironed out by pending Augmentation Legislation, as is planned for the Army and Air Force. It's expected that the Navy will propose new legislation next year to eliminate the promotion problem, unless the Armed Services Committees demand that remedial action be recommended in connection with consideration of the Augmentation Bill.

THE ENLISTED STRUCTURE in the Services will be reviewed by the Cordiner Committee. Some Pentagon officials—and many at the Budget Bureau—feel that the Armed Forces have been upgrading many enlisted jobs in order to provide necessary retention pay for enlisted men. MORE THAN HALF of all EM on active duty are in the top four grades. Object of the forthcoming study will be to provide extra pay for critical specialists, without necessarily promoting them at an accelerated clip. ANOTHER PROBLEM that causes concern is the wide disparity among the Services in time-in-grade requirements for EM promotions; in some instances, it's possible to get ahead three times as rapidly in one Service as in another.

Your Staff

HOW TO GET INVESTMENT FACTS about Mutual Funds

- ☐ CONSERVATIVE TYPE—Capital conservation, modest income.
- ☐ MIDDLE-OF-THE-ROAD-TYPE—Emphasis on current income.
- ☐ AGGRESSIVE TYPE—Emphasis on possible growth of capital with current income secondary.

I understand that full information will be sent to me at no cost or obligation when I mail this advertisement, and that this information is to guide you. Achieving objective is not assured.

SERVICE FAMILY NOTES

FOUR GENERATIONS are represented in the family of Maj. Gen. E. D. Post, USA, commanding general of the Western Area Command, Kaiserslautern, Germany. Shown are, left to right, Mrs. E. D. Post, her daughter Mrs. H. F. G. Boswell, Mrs. Post's mother Mrs. Phillip B. Ewalt, in front, and the Posts' grandchildren, Virginia P. Boswell and Patrick Henry Boswell.

INVITATIONS to a "get-acquainted" coffee party at the Army-Navy Club on Tuesday, 5 June, have been issued by the Armed Forces Hostess Association to 743 Service wives who have arrived in the Washington area within the last three months.

In addition to welcoming newcomers to the area, the AFHA maintains an information office in the Pentagon, where in the past year they have answered thousands of inquiries concerning, among other things, schools, camps, babysitters and shopping services. They also operate an overseas file for the benefit of families leaving the area for duty in foreign lands.

Andrews OWC Flower Show—

12 June is the date chosen by the Officers' Wives' Club of Andrews AFB for its "Around the World With MATS" flower show. Mrs. Dudley D. Hale and Mrs. Thomas E. Moorman, co-chairmen of the event, have planned to transform the NCO Club into a garden spot that will be long remembered. In keeping with the theme, the ballroom will feature gardens from the four corners of the world, created by the co-chairmen, with the assistance of Mrs. Howard E. Kreidler and Mrs. C. M. Stubbs.

All regular and associate members of the Club and their families are eligible to enter arrangements, tables and horticulture specimens. In addition, one feature will be classes for all the children of the Base, and will be divided into four categories: (1) All children from 2 to 6; (2) Children from 6 to 12; (3) Teen Town; (4) Scout entries.

The regular Officers' Wives' Club meeting will be held at 2:30. Tea will be served from 2:30 until 4:30, and from 4:30 to 6:30, the public is invited to attend. At this time a photography contest open to all Base Personnel will take place. Prizes will be awarded for the best pictures.

Guests of honor at the Club's tea will be Mrs. Donald Quarles, wife of the Air Force Secretary, Mrs. Nathan F. Twinning, wife of the Air Force Chief of Staff, and Mrs. James H. Douglas, wife of the Air Force Under Secretary. The wives of

"GRADUMATES"

A "Gradumate" diploma will be presented to wives of officers of the regular course at the Command and General Staff College, Ft. Leavenworth, Kans., at a party, 3 June.

The diplomas, which confer on the wives the degree of PHT (Pushin' Hubby Thru), reads as follows:

"The Command and General Staff College, United Students Wives, To All Who Shall See These Presents Greeting. Be it known that . . . having successfully completed and survived the required course in the Feeding, Care and Coddling of her Student in The Command and General Staff College and having retained mental and physical fortitude in the patient and diligent discharge of her duty, has been declared a Gradumate."

"In testimony whereof, and, by the authority vested in us, We so confer upon her this diploma with the honorary degree of PHT."

the Air Attaches of all foreign governments have also been invited to be guests of the Club.

The event promises to be a most outstanding flower show. During the afternoon, music will be furnished by the Strolling Strings of the Air Force Band.

Ft. Myer OWC Has Active Month—

Heading the May activities of the Ft. Myer, Va. Officers' Wives Club was the annual Mother's Day tea dance and buffet supper, for which Mrs. Charles Gould was chairman.

At another tea, the Club's new officers were installed. The slate includes Mesdames R. N. Smith, president; W. C. Collins, vice-president; H. J. Affley, secretary; and William Schubert, treasurer.

For its May luncheon, the Club had as its guest speaker, Capt. H. J. Rickard, senior Medical Officer at Ft. Mugu, Calif., who is well known for his new method of artificial respiration for young children.

Weekly beginners' and advanced golf lessons have been started under the Club's sponsorship, as well as bowling and bridge playing. Navy Relief work, the entertainment of patients at one of the State Hospitals and USO participation constitute some of the activities in which the group is engaged.

Northern Va. Dusa Tea—

The Northern Virginia Chapter of the Daughters of the U. S. Army will conclude its first season's activities with a tea honoring its newly-elected officers.

ARMY MEDICAL SERVICE WOMAN'S CLUB OFFICERS—Newly-elected officers of the Army Medical Service Woman's Club at Walter Reed Army Medical Center Officers' Club: (seated, L-R) are Mrs. Leonard D. Heaton, honorary president of the club; Mrs. Thomas J. Hartford, president. In the back row (L-R) are Mrs. George H. Timke, Jr., program chairman; Mrs. John H. Voegtly, hospitality chairman; Mrs. Paul A. La Pointe, treasurer; Mrs. Anthony L. Brittis, secretary, and Mrs. Jack W. Schwartz, vice-president. The club is composed of wives of Army Medical Service Corps and Army Medical Corps officers on duty at Walter Reed Army Medical Center.

The affair will be held at Patton Hall, Ft. Myer, Va., on Wednesday, 6 June, from 2 to 4 p. m.

The honorees are Mesdames T. F. Spencer, president; Henry Spengler, 1st vice-president; L. A. Kunzig, 2d vice-president; H. A. Snyder, 3d vice-president; D. F. Kovarick, secretary; and Howard E. Reed, treasurer. Acting as hostesses will be the retiring officers.

The members of the Washington Chapter are cordially invited to attend, as are all qualified daughters or granddaughters of Army officers. For reservations, call Mrs. T. F. Spencer at KI 8-1747, prior to 4 June.

SERVICE FOLK

MRS. THOMAS L. GATCH, SR., widow of **VICE ADMIRAL GATCH, USN**, is now making her home with her son, **CAPT. THOMAS L. GATCH, JR.**, at 1317 E. Las Animas St., Colorado Springs. . .

MRS. JAMES C. LAFFERTY, wife of **CAPTAIN LAFFERTY** of MATS Continental Division Hq., narrowly missed adding the Texas Women's Golf Championship to her string of fairway laurels. Included among her recent golfing feats was a brilliant win over nationally rated Betty Jean Martinez, to capture the San Antonio city crown. . .

JOHN T. STITZEL, 17-year-old stepson of the late **MAJ. DOIL R. STITZEL, USMC**, has been awarded the First Marine Division Association Scholarship. Now a senior at the New Bern, N. C. High School, young Stitzel will attend the State College of Engineering of the University of North Carolina, at Raleigh. . .

Graduating from the U. S. Military Academy on 1 June is **CADET MICHAEL F. CAVENAUGH** of the third generation in his direct line to graduate there. He is the son of **HARRY T. CAVENAUGH, '24**, and grandson of **HARRY L. CAVENAUGH, '95**, who was the first cadet to graduate from the State of Oklahoma. Cadet Cavenaugh represents the fifth generation of his family in the Regular Army. His great-grandfather was **COL. HARRY G. CAVENAUGH** and his great-great-grandfather was **CHAPLAIN J. A. M. LATOURETTE**. . .

FRANK J. BOCHNOWSKI, son of **LT. COL. and MRS. JOSEPH S. BOCHNOWSKI** of Ft. McClellan, Ala., has been presented the Balfour Award for outstanding achievement in academic and extra-curricular activities, at the Anniston, Ala. High School, and was also presented the Babe Ruth Sportsmanship award for his participation in athletics. Young Bochnowski received an appointment to the U. S. Military Academy from Congressman Kenneth A. Roberts of Alabama, and will enter West Point on 3 July. . .

4TH ARMOR GROUP, (APO 757-N. Y.). New officers of the Gibbs Barracks NCO Wives Club are: Mrs. Thomas N. Caldwell (seated lower center), President; Mrs. Glen O. Maynard (right), vice-president; Mrs. Glenn L. Harrison, (left), Secretary; and Mrs. Robert L. Nutter (above center), Treasurer.

NWC Women's Club Farewell—

The members of the Women's Club of the National War College will have the pleasure of their husbands' presence when they meet for their last luncheon at noon on Wednesday, 6 June at the Ft. McNair Officers' Club.

Guests of honor will be the Commandant of the National War College, VADM. and Mrs. Edmund T. Wooldridge. Mrs. Robert J. Oliver, wife of Captain Oliver, USN, will preside. Others seated at the head table will be the Deputy Commanders of the College and their wives, Maj. Gen. (USA) and Mrs. Robert W. Berry, Maj. Gen. (USAF) and Mrs. Wiley D. Ganey and the Honorable Henry S. Villard of the State Department, and Mrs. Villard, together with the College's Executive Officer, Col. and Mrs. Jack H. Griffith. Also at the head table will be members of the Club's Executive Council and their husbands. These include Captain and Mrs. Oliver, Col. (USA) and Mrs. William A. Kuhn, Col. (USAF) and Mrs. Mayhew D. Blaine and Mrs. Edward L. Freers and Mr. Freers of the State Department.

Hostesses for the luncheon will be Mesdames Oliver, Kuhn, Blaine and Freers.

Belvoir OWC To Elect—

Approximately 400 invitations have been sent to members and guests for the Ft. Belvoir, Va. Officers' Wives Club's luncheon and election of officers at MacKenzie Hall on Tuesday, 12 June, at 12:30 p. m.

Wives of officers at The Command Management School and The Post Engineer Organization will be hostesses, with Mrs. Frank Kowalski, jr., and Mrs. George E. Pickett, co-chairmen for the event. The latter will also preside at the short business session, since the Club's president, Mrs. Walter H. Parsons, jr., plans to be at College Station, Tex. where her son, Walter, 3d, is being graduated from Texas A. & M.

Election of officers for the coming season will be on the agenda. Chairman of the nominating committee, Mrs. John B. Gibbons, plans to offer a thoughtfully-selected slate of nominees, and the committee will welcome nominations from the floor.

Assisting with arrangements will be Mesdames George C. Jaka, Clifford Marr, Wesley Thomas, reservations; Dan Gilmer, Ernest Clark, Lee Devore, jr., James K. Terry and Charles Austin, decorations. Mrs. Clifford Edgar with Mrs. Henry Bartecchi will dispense sherry at the social hour preceding lunch.

Kirchoffs Honored—

Col. and Mrs. J. L. Driskell were hosts at a cocktail buffet party at McKenzie Hall, Ft. Belvoir, Va., on 28 May, honoring Col. and Mrs. A. A. G. Kirchoff. Colonel Kirchoff, who has been the Chief of Staff of The Engineer Center and Ft. Belvoir, is retiring from active duty on 30 June. Invited guests were Gen. L. W. Johnson, Lt. Gen. and Mrs. S. D. Sturgis, jr., Maj. Gens. and Mesdames Charles H.

Posts, Stations & Bases

From Preceding page—

for revisions and Mrs. William R. Cohen will head this committee. Mrs. Glassen added that if it weren't for her executive board members who are Mrs. Mott Duncan, Mrs. Ernest Gray, Mrs. Randall O'Dea, Mrs. Jack Williams, Mrs. J. W. Cotterill, and the interest of all members, the Club could not go ahead with these plans.

Mrs. Glassen was teaching in the government school in Panama when she met and married Colonel Glassen, now Deputy Chief of Staff of Ft. Lewis, and 2d Division. The Glassens have four sons, Richard, 12; Robert, 10; Thomas, 5½, and Mark, 3½.

Staff Changes At Dix

■ **FORT DIX, N. J.**—Staff changes involving two troop commands were announced by the post commander, Maj. Gen. Robert W. Ward, USA.

Col. Russell B. Smith, USA, former commander of Service Troops here, has been appointed commanding officer of the newly-activated 3d Training Regiment. Succeeding Colonel Smith will be the post's former investigations officer, Col. Edward J. Grant, USA.

Mrs. Gould Takes Office

■ **FT. SAM HOUSTON, TEX.**—The Station Complement Officers' Wives Club will meet for breakfast 6 June when Mrs. C. L. Gould, newly elected president, will take office. Other new officers are Mesdames J. R. Hershey, First Vice-President; C. P. Bartow, Second Vice-President; H. R. Byram, Secretary; Joe Pozero, Treasurer; J. J. Fairley and L. B. Kovacs, Board Members.

Mrs. L. B. Kovacs, retiring president, will turn her gavel over to the new president. Mrs. Henry F. Taylor, Honorary President, will give brief talks about each of the retiring officers and her accomplishments.

Hostesses for the event will be wives of the Post Ordnance, Comptroller, Finance & Accounting sections and Camp Bulls with Mrs. C. P. Bartow, chairman, assisted by Mesdames J. A. Creati, C. E. Anderson, H. L. Dix and W. H. Boies.

Wins Citation From VFW

■ **TOPEKA AIR FORCE DEPOT, KANS.**—Col. Brunow W. Felling, USAF, Commander, recently received the Community Service Award from the Veterans of Foreign Wars Post in appreciation of his and the Depot's "outstanding community service support and achievements."

ROBINS AFB, GA.—Newly-elected officers of the Wives Club for the year 1956-57 are: (left to right) Mrs. L. S. Fulwider, president; Mrs. C. R. Feldmann, vice president; Mrs. Leo F. Brady, second vice president; Mrs. C. H. Clark, recording secretary; Mrs. Earl E. Bates, corresponding secretary; Mrs. Marvin H. Sellers, assistant corresponding secretary; Mrs. Philip C. Nichols, assistant treasurer; and Mrs. James H. Ainsworth, parliamentarian. Not present when the picture was taken were Mrs. William A. Fickling, jr., assistant recording secretary; and Mrs. J. R. Baines, treasurer.

Mrs. Harry A. Schendel

■ **FT. MONROE, VA.** The Officers' Wives Club brought its club-year to an end with the installation of new officers and a talk by General John E. Dahlquist, USA-Ret., former Commanding General, Continental Army Command.

Mrs. Harry A. Schendel, jr., took over the gavel from Mrs. Camden W. McConnell, who presided at the meeting. Other officers installed were: Mrs. Ronald K. Irving, vice-president; Mrs. Jesse F. Wheeler, jr., treasurer; Mrs. Stanley A. Kretlow, secretary, and Mrs. A. L. Ahnfeldt and Mrs. J. L. Drewry, board members-at-large.

Mrs. W. G. Wyman is honorary president. Mrs. S. F. Parr, the retiring vice-president, presented a silver tray to the outgoing president, Mrs. McConnell, in honor of her services during the past year. The program chairman, Mrs. H. M. Forde, was given a silver bowl.

Mrs. W. R. Goodrich

■ **CARLISLE BARRACKS, PA.** The Army War College Officers' Wives Club held their final luncheon meeting of the school year on 15 May at the Officers' Open Mess.

Mrs. W. W. Harris, president, reviewed the accomplishments of the Club during the past year and thanked the officers and executive council for their support. In appreciation for their accomplishments, Mrs. Harris presented certificates to the following chairmen of the special activities: Mrs. C. E. Bledsoe, bowling; Mrs. A. C. Haley, Hobby Show; Mrs. V. A. Ishoy, exercise; Mrs. C. L. Johnson and Mrs. G. S. Johns,

flower arrangements; Mrs. C. R. Meyer and Mrs. R. B. Marlin, bridge; Mrs. C. E. Johnson, tennis; Mrs. W. R. Goodrich, newcomers book; Mrs. F. W. Ellery, welcoming committee; and Mrs. W. D. McKinley, Mrs. R. C. Leslie, Mrs. W. J. McConnell, Mrs. D. P. Armstrong, holiday parties for the children.

Mrs. A. O. Connor, secretary, presided during the election of officers for the coming school year. Elected president was Mrs. W. R. Goodrich; vice-president, Mrs. I. L. Luthi; secretary, Mrs. J. R. Shepherd; treasurer, Mrs. F. W. Marshall.

Mrs. Max S. Johnson, wife of the Commandant of the Army War College and honorary president of the club, presented an engraved gavel to Mrs. W. W. Harris in appreciation of her services as president during the past year.

Mrs. William W. Dick, jr.

■ **STUTTGART, GERMANY.** Mrs. William W. Dick, jr., wife of Major General Dick, USA, Seventh Army CofS, has taken office as Director of the Office of Volunteers for the American Red Cross in the European Area. She succeeds Mrs. William Shure, wife of Colonel Shure, USA, VII Corps Chaplain, who is returning to the U.S. with her husband, newly assigned to Ft. Leonard Wood, Mo.

The director of the Office of Volunteers is a volunteer position and the highest in the Red Cross volunteer program in Europe. Mrs. Dick will direct the activities of some 10,000 volunteer Red Cross workers in Germany, Italy, France, Greece, North Africa, England and the Near East.

ANDREWS AFB, MD.

Newly-elected officers of the Officers' Wives Club. Seated (left to right): Mrs. George Felton, second vice president; Mrs. Carl P. Bauk, president; Mrs. Chas. Atkinson, vice-president. Standing (left to right): Mrs. Donald Wolfe, corresponding secretary; Mrs. Leon Tannenbaum, assistant treasurer, and Mrs. Edwin Saar, recording secretary. Not shown: Mrs. John Scales, treasurer.

RETIRED SERVICE NOTES

They Keep Busy

LT. GEN. GEORGE P. HAYS, USA-Ret., now in private business and WWII commander of the 10th Mountain Division in Italy, participated in Memorial Day services at the Nettuno Military Cemetery near Rome on 30 May. He and Mrs. Hays were guests of the Italian Government. The general, at the request of the Italian Government, was the principal speaker at ceremonies honoring Americans who gave their lives at Anzio and in other actions of the Italian Campaign.

Lt. Gen. Hays

LT. GEN. ROBERT W. HARPER, USAF-Ret., has joined the firm of Gibbon, Klein and Ferrero in the Texas Reserve Building, Harlingen, Tex. General Harper was head of the Air Training Command prior to his retirement from active military service.

COL. U. GRANT JONES, USAF-Ret., has accepted a position as Real Estate salesman with the Marvelous Marin Realty Co., of San Rafael, Calif.

MAJ. MARK FRANKLIN HILL, AUS-Ret., has been appointed a sales representative for Seagram-Distillers Company in Metropolitan Boston. He makes his home with his wife, Lillian, and their two children, Mark Ovella, 13, and Lucille Kathryn, 1, at 879 Central Street, Stoughton, Mass.

Lt. Col. John C. Carter Retires

Retirement ceremonies were held for Lt. Col. John C. Carter, MSC at Ft. McClellan, Ala., on 31 May. Colonel Carter entered the Army as a Private on 15 November 1926.

Immediately after retirement he and his wife and daughter Sylvia intend to travel for about three months in the US and Canada. Their temporary home address is: 3242 Coolidge Ave., Los Angeles 66, Calif. In the fall they intend to make their permanent home in Florida.

Cites FDR's Physician

Adm. Ross T. McIntire, MC, USN-Ret., has been awarded a special citation by President Eisenhower for "outstanding performance" as a former Chairman of the President's Committee on Employment of the Physically Handicapped.

The citation was presented to Admiral McIntire by the present Chairman, Maj. Gen. Melvin J. Maas, USMC-Ret., at the Committee's annual meeting.

VAdm. Pownall (Ret.)

Offers Citizens' Creed

VAdm. Charles A. Pownall, USN-Ret., of La Jolla, Calif., Commander-in-Chief of the Military Order of the World Wars, in an address before the District of Columbia Chapter has proposed a "Creed for the American Citizen" in response to the "Creed of the Fighting Man" propounded recently by President Eisenhower in an Executive Order.

The President's Creed read, "I am an American Fighting Man, I serve in the Forces which guard my Country and our Way of Life. I am prepared to give my life in their defense."

Admiral Pownall responded, as in a toast of good citizens to our fighting men, in these words:

"I am an American Citizen.

"I love my freedom and our American way of life.

"I know that tyrannical forces are poised and working with the objective in mind of taking these cherished Blessings away from me by force.

"You, the American Fighting man, stand on guard to defend me and my way of life, sacrificing your own life, if need be, for my protection.

"I am appreciative of devotion to duty, and am concerned in all matters pertaining to your welfare and that of your family as well.

"I desire for you the spirit, the feeling of contentment and satisfaction in the honored service of American arms.

"You are my protector, I am your friend always."

PL 810 Retirements

The Army has placed the following named National Guard and Reserve officers on the retired list upon their attainment of age 60 and completion of at least 20 years creditable service as provided under Title III, PL 810, 80th Congress:

RETIRED MARINE COMMANDANT HONORED

A pistol trophy prepared by the people of San Clemente, Calif., for the Pendleton Marines was presented to the man to whom it is dedicated—General Thomas H. Holcomb, USMC-Ret.,—during recent ceremonies at Camp Pendleton.

The presentation was made by Marjorie Divil, Miss San Clemente, who was introduced by Brig. Gen. David H. Blakelock, USA-Ret., mayor of San Clemente and originator of the trophy.

The General Holcomb Trophy was then presented to the winning pistol team in the Marine Corps Western Division Matches being held here.

Maj. Gen. George F. Good, Jr., USMC, Pendleton Commander introduced honored guests Lt. Gen. Vernon E. Megee, USMC, representing the Commandant of the Marine Corps; and Lt. Gen. Harry Schmidt, USMC-Ret.

General Holcomb was Commandant of the Marine Corps from 1936 to 1943. While Commandant, General Holcomb emphasized the importance of pistol and rifle shooting and instituted many practices that led to keener interest in shooting.

Burial was at Arlington National Cemetery.

Obituaries

Col. Richard Hanson Grinder, USA-Ret.

Burial services will be held at West Point, N. Y., on 4 June, for Col. Richard Hanson Grinder, USA-Ret., 54, former Senior Army Advisor of the Arizona Military District. He died at his home at Phoenix, Ariz., 23 May, following a long illness.

Born at Oil City, Pa., Colonel Grinder was graduated from USMA in 1926 and served in Hawaii, Panama, Puerto Rico and several posts in the United States prior to WWII. He went to England in 1942 and later, served as Executive Officer of the 56th Anti-Aircraft Artillery Brigade, which downed as many as 100 V-1 bombs per day in the defense of the vital port city of Antwerp, Belgium. There, Colonel Grinder was wounded twice by fragments of bursting V-2 rockets.

Following the war, Colonel Grinder served in Japan as Deputy Information Officer for the Eighth Army, and later as Information Officer for the Japan Logistical Command. He became Senior Army Advisor for Reserves for the State of Arizona in 1953.

He is survived by his widow, Mrs. Dorothy Grinder of Phoenix; one daughter, Dorothy

Alleen Grinder; one son, 1st Lt. Richard H. Grinder, Jr. (USMA '54), of Niagara Falls, NY; and one grandson, Richard H. Grinder, III.

RAdm. Alexander F. Junker, USN-Ret.

RAdm. Alexander F. Junker, USN-Ret., died at the U. S. Naval Hospital, St. Albans, L. I., N. Y., 23 May, at the age of 54.

Born at Pittsburgh, Pa., Admiral Junker was graduated from USNA in 1922. He took a course in Diesel Engineering at the Post Graduate School at Annapolis, and received his Master of Science degree from Columbia University in 1930. Admiral Junker saw service in the submarine field from 1930 to 1938. In 1940, he assumed the post of Engineer Officer of the USS Lexington, on which carrier he participated in many Naval engagements in the early days of the war in the Pacific.

Admiral Junker was one of the last to abandon the gallant old ship before she sank, on 8 May 1942, following the Battle of the Coral Sea. In 1944, Admiral Junker was assigned duty as Port Captain at Christobal, Canal Zone.

In May 1950, Admiral Junker was ordered to duty as Commander of the Military Sea Transportation Service, Western Pacific, and arrived in Japan just prior to the outbreak of the Korean fighting. For the following 18 months, he organized and guided MSTW-PAC in an area of war operations, where daily movements were numbered in the hundreds and ship tonnages in the millions.

Admiral Junker's last tour of active duty before his retirement was as Inspector General for the Military Sea Transportation Service. Following his retirement and until the time of his death, he was associated with

the Hoffman Machine Co., at Poughkeepsie, New York.

He is survived by his widow, Mrs. Ruth Bishoff Junker.

Col. Henry Paul Hollowell, USA-Ret.

Burial services for Col. Henry Paul Hollowell, USA-Ret., 63, who died at the Warren AFB, Wyo. Hospital, 6 May, were held at Lakeview Cemetery, Cheyenne, Wyo., on 8 May.

A native of Philadelphia and graduate of Peddie Preparatory School and Colgate University, Colonel Hollowell's Army career covered the period from 1916 to 1953, and included service on the Mexican Border, WWI, in the Aleutians in WWII, the Philippines and at many posts and stations in the United States.

Colonel Hollowell was married to Miss Helen Eglesfield of Indianapolis, Ind., who died in 1932. While stationed at Ft. Warren in 1946, he was married to Mrs. Louise Stinson Patterson, who survives him and whose address is 214 W. 25th St., Cheyenne, where they have made their home since Colonel Hollowell's retirement from active duty in 1953.

In addition to his widow, he is survived by two sons, Mr. H. Paul Hollowell, Jr., of San Francisco, and Mr. Richard A. Patterson of Rock Springs, Wyo.; and two grandchildren.

Honor AF Dead

A memorial service for all deceased Air Force personnel was held last Sunday by the Air Force Association at Arlington National Cemetery.

A wreath was placed on the grave of General of the Air Force H. H. Arnold. Memorial remarks were made by Brig. Gen. Robert L. Scott, Jr., USAF, director of Information Services, and a memorial prayer was offered by Chaplain (Col.) J. F. Patterson, USAF.

President's Approval Of Family Medicare Bill Means Work For Pentagon Committees

The Pentagon was busy this week getting together three top-level working groups to develop proposals under which the Defense Department will "buy" a medical care insurance program for hundreds of thousands of Service families unable to get into military hospitals.

Authority for the "purchase" is contained in the \$55 million Family Medicare bill which was at the White House awaiting the President's signature this week.

The bill gives the Defense Department six months in which to complete the purchase and put the new plan into operation. The effective date will be late November or early December.

Defense Secretary Charles E. Wilson is expected to act quickly in establishing insurance, medical service and health plan advisory committees to draft proposed terms for the insurance contract. A Pentagon Medical Care Task Force Group headed by Capt. John V. Noel, Jr., USN, will correlate the work.

Here are the details of the legislation:

Care In Civilian Facilities

The Defense Secretary is authorized to contract for medical care of wives and dependent children of Servicemen under an insurance, medical service, or health plan which will include the following:

Hospitalization in semiprivate accommodations for a maximum of 365 days for each admission, including all necessary services and supplies furnished by the hospital during inpatient confinement.

Medical and surgical care incident to a

period of hospitalization.

Complete obstetrical and maternity service, including prenatal and postnatal care.

The required services of a physician or surgeon prior to and following hospitalization for a bodily injury or for a surgical operation.

Diagnostic tests and procedures, including laboratory and X-ray examinations, accomplished or recommended by a physician incident to hospitalization.

Dependents will pay the first \$25 of the expenses in civilian hospitals for each admission or the uniform inpatient charge established for dependents hospitalized in Service facilities multiplied by the number of days hospitalized, whichever is the greater.

Dependents may elect, however, to receive medical care in either a military hospital or in the facilities provided for under the insurance plan. Except that the right to such election may be limited under SecDef regulations for dependents residing in areas where the member concerned is assigned to a post or installation where adequate Service or Public Health facilities are available for such dependents.

Care In Military Facilities

Dependents of both active and retired personnel as well as dependents of deceased personnel who died on active duty, will be given medical care in military hospitals and medical facilities when they request such care, subject to

the availability of beds, doctors, and so forth.

Dependents may enter any Army, Navy, Air Force or Public Health Service hospital or medical facility regardless of their own Service affiliation.

The bill authorizes the Defense Secretary to establish uniform charges for inpatient medical care given dependents in military facilities.

He also is authorized to impose uniform minimal charges for outpatient care provided through Service facilities when such charges are determined necessary.

Medical care in military hospitals and medical facilities will be limited to diagnosis, treatment of acute medical and surgical conditions, treatment of contagious diseases, immunization, and maternity and infant care.

Hospitalization in military facilities is not authorized for domiciliary care. Neither is it authorized, except in "special and unusual cases," for chronic diseases, nervous and mental disorders; and elective medical and surgical treatments. In special cases, hospitalization or treatment not to exceed 12 months may be authorized.

Dental care at military facilities will be provided only in cases of emergency to relieve pain and suffering or as a necessary adjunct to medical or surgical treatment. Such care will not include permanent restorative work or dental prosthesis.

Dental care is authorized, however, for dependents outside the continental U.S., or in remote areas within the U.S. where adequate civilian dental facilities are not available.

Military ambulance service will not be

provided dependents except in acute emergency.

Home calls by military physicians are not authorized except in special cases where it is determined by the cognizant physician to be medically necessary.

Nor will military facilities provide dependents with prosthetic devices, hearing aids, orthopedic footwear and spectacles, except outside the continental U.S. and at remote stations within the continental U.S. where adequate civilian facilities are not available. In the latter case, dependents will be furnished such items at cost if they are available in Government stocks.

The Pentagon also is authorized to issue regulations prescribing medical and dental care in Service hospitals for Servicemen on active duty, those ordered to active duty for training.

Personnel retired under Title III who have served on active duty for at least eight years are eligible, together with their dependents for medical care in military facilities.

Retired enlisted men shall not be charged for subsistence in facilities of a uniformed service.

Where an insured dependent or retired member requires hospitalization beyond the 365-day maximum provided in the bill, he may be transferred to a Service medical facility for continued hospitalization. Or, if he cannot be moved, the expenses of the additional hospitalization in a civilian facility will be paid by the Government.

Definition of Dependent

The act defines dependents of male or female members or retired members of the uniformed services as follows:

Here Is Breakdown, By Rank, Of Army Integration Plans For First Two Years

A detailed breakdown, by rank, of the Army's plan to integrate approximately 7,250 officers during the first two years after passage of the Regular Officer Aug-

mentation bill has been presented before the Kilday House Armed Services Subcommittee.

An Army spokesman told the group that present plans call for the integration of about 60 officers in the grade of colonel, 1600 in the grade of lieutenant colonel, 1250 in the grade of major, 2450 in the grade of captain, 1440 in the grade of first lieutenant and 450 in the grade of second lieutenant during the first 24 months.

Some members of the committee urged that the integration plans be accelerated. Others recommended that the Services take their time in making the selections.

Maj. Gen. Donald P. Booth, USA, Assistant Deputy C/S of the Army for Personnel, said an application period of at least six months' will be necessary to get regulations out to Army installations all over the world. This is due to be followed by security checks. He said the actual administrative determination of the officers to be integrated will not be possible before the second year after the plan goes into operation.

Representative Bob Wilson (R-Calif) said he thinks the Services should set their sights "on something a little shorter than two years" since many Reserve officers are leaving the Service.

General Booth said he believes passage of the Augmentation bill will keep many of the Reservists on active duty until the integration is completed.

1—His lawful wife; her lawful husband if dependent on her for over half his support.

2—His or her unmarried legitimate children under 21 or unmarried children over 21 who are incapable of self-support because of mental or physical defects (that existed before age 21) and who are dependent on the member for over half of their support.

3—His or her dependent children under 23 who are duly enrolled in a full-time course of study in an institution of higher learning as approved by the Defense Secretary.

4—The term "children" in addition to the member's own, or lawfully adopted children, includes stepchildren.

5—The male member's or female member's parents and parents-in-law if in fact dependent on the member for over half of their support and residing in the member's household.

6—His unmarried widow and children (as previously defined); her widow if at the time of the member's death he was dependent on her for over half of his support because of a mental or physical incapacity, and her children as previously defined.

AUTOMOBILES

"BUY WITH CONFIDENCE" Best Final Delivered Prices on CHRYSLERS—PLYMOUTHs. Complete dockside service for returning personnel. Additional saving at factory. No State Sales Tax. Choice of financing and insurance at lowest rates. F. S. Pearson Sons, Inc. Hurlville, N. J.

DETROIT'S OLDEST FORD DEALER. Buy direct and save. Immediate delivery. Write Sales Manager, 13115 Mack Avenue, Detroit 15, Michigan.

NEW CHEVROLETS—Immediate San Francisco delivery. Factory deliveries arranged if desired. Special Servicemen's discount, terms, insurance and financing. Call us on arrival in San Francisco or contact us by mail. Herb's Chevrolet Co., 383 Miller Avenue, Mill Valley, Calif. Dunlap 8-0441.

DON'T GOOF! Buy your car in the Motor City and deal direct with the World's largest Chevrolet Dealer. Volume sales mean our cost is less so we sell for less. Special consideration for servicemen. No freight charges, no sales tax, and driveaway sticker to destination good for 30 days. Others blow those bugles but we sell the cars. Get our deal and find out why more people buy from us. Contact Mr. Nadeau, Military representative, Don McCullagh, 16700 Harper, TUXedo 1-7600, Detroit, Michigan.

PETS BOARDED

Being transferred soon? Ship pets to us. Good food, heated quarters, individual outside runs, personal care provided awaiting your arrival. Reasonable rates. Write Kriss Kross Kennels, Centerville, Virginia (25 minutes from Washington, D. C.) Phone Browning 8-8101. Dorothy Vanderveer.

EDUCATIONAL OPPORTUNITIES

QUALIFY FOR A COLLEGE EQUIVALENCY DEGREE by comprehensive examination. Double your chance for promotion, better pay, etc. No courses. Free details. Cramwell, D-7, Adams, Mass.

OPPORTUNITIES AVAILABLE

ATTENTION: RETIRED OR RESERVE OFFICERS: Here's an opportunity to represent an established, respected company. In most cases you can choose the area in which you wish to live. Average earnings of retired officers now with the company are more than \$10,000 a year. Write Box 100, The Journal.

Retired or Retiring Soon? We offer a new career opportunity with the largest and oldest serviceman's organization. Dignified work, interesting and remunerative. More than 100 representatives, many of whom you know. Openings at certain bases in Southwest and Midwest. Write Box 112, THE JOURNAL.

"Teachers in mathematics, science, English and social studies are desired at a private (non-military, non-denominational) school. If interested contact Brig. Gen. Aubrey C. Strickland (Ret.), Headmaster, Lakemont Academy, Lakemont-on-Seneca, New York."

"Wanted: Medical Laboratory Technicians! General duty techs preferred. Start at minimum of \$250/mo., plus fringe benefits. References required. Write—Clinical Pathologist, York Hospital, York, Pennsylvania."

RETIRING? Don't sit under a tree. Join Lt. Col. Robinette's Investment Sales Organization in fabulous Southwest. 4235 Keltner, El Paso, Texas.

BUSINESS OPPORTUNITIES

Attractive proposition awaits your investigation to become associated now or after retirement with retired officer in expanding poultry egg and breeding project located in sunny California, into largest known. Box 105, THE JOURNAL.

FOR SALE

THE FATHER'S DAY GIFT he will appreciate is a set of Balfour Quality rank insignia. Free pamphlet. L. G. Balfour Company, Attleboro, Mass.

HANDY CHANGE OF STATION CARDS and envelopes. Smart service jingle. Name and NEW address printed on 3 lines. 25 for \$2. Postpaid. Marie Faith Hughes, 854 Emmett St., Schenectady 7, N. Y.

INDUSTRY IN DEFENSE

Navy Will Spend Another \$20 Million For Crusader; New Nuclear Lab Planned

Chance Vought Aircraft, Inc., has received a Navy contract totaling more than \$20,000,000 for additional production of F8U-1 Crusader air superiority fighters.

The new contract for deliveries of the Crusader, the world's fastest Navy fighter and described by the Navy as operating "in an entirely new speed range well beyond the supersonic," followed earlier production orders of \$45,000,000 in March, 1956, and \$100,000,000 in December, 1955. It increases to more than \$275,000,000 the total amount of Navy contracts covering the Crusader program since Chance Vought, competing with seven other aircraft manufacturers, won a Navy design competition in May, 1953.

The experimental prototype XF8U-1 made its first flight 25 March, 1955, exceeding the speed of sound in level flight. The first F8U-1 production model flew on 30 September, 1955.

Expected to be the Navy's primary first-line fighter when it reaches the Fleet, the Crusader recently went aboard the USS Forrestal for carrier qualification trials designed to test its performance under actual operating conditions at sea. The tests, including catapult launchings and arrested landings, were described by the Department of Defense as "generally satisfactory."

The Curtiss-Wright Corporation will establish a new **Nuclear Materials Laboratory** consisting of a reactor and radioactive hot cells for the support of defense production and also for peacetime applications of atomic energy.

Ray Kozonski, former electronics engineer for General Electric Company's Heavy Military Electronics Equipment Department, has been appointed specialty resistor product engineer for GE's Carboly Department.

Raytheon Manufacturing Company has leased, with an option to buy, the Shawshen Mill properties in Andover, Mass., for the production of military equipment it is developing for the **Army Ordnance Corps**.

Sperry Gyroscope Company has developed advanced **electronic analyzers** to speedily detect and pinpoint, both on the ground in flight, hidden malfunctions in the engines of planes. The Air Force plans to make wide use of the analyzers.

The Navy's second 600-miles-per-hour **multi-jet seaplane**, the XP6M-1 Martin SeaMaster, is being flight tested near the Martin plant at Middle River, Md.

Frank H. Higgins, Assistant Secretary of the Army for Logistics, Research and Development, was principal speaker at ceremonies dedicating the Charlotte Ordnance Missile Plant in North Carolina where the Army's NIKE missile will be produced. **Douglas Aircraft Company, Inc.**, will operate the plant.

McDonnell Aircraft Corporation has designed, built and started operating a facility for full scale structural **testing of missile components** under extreme heat conditions which would be encountered at more than 5000 miles an hour.

MARTIN GETS TACTICAL BOMBER AWARD

The Martin Company has been selected the winner of an Air Force competition to develop a new experimental tactical bomber.

Last August, the Air Force announced the award of development contracts for the new bomber to Martin and Douglas Aircraft Company, Inc.

At that time the Air Force said, "The Phase I development contracts will be written in a way which will give the manufacturers as much latitude in the design of the aircraft as possible in order that the technological advance in

• Delton M. Lundberg, who served as a fighter pilot in the Navy during WW II and was discharged as a lieutenant commander in 1945, has been named West Coast Representative for Martin's Sales Division.

• An \$85,000 contract for design and development of a "tilt-wing," turbine-powered vertical takeoff and landing (VTOL) research aircraft has been awarded by the Office of Naval Research and the Army to Vertol Aircraft Corporation.

William C. Foster, executive vice president of Olin Mathieson Chemical Corporation, was elected to the **board of directors** of the Marquardt Aircraft Company at a recent stockholders meeting. Mr. Foster is a former Deputy Secretary of Defense.

Dr. Clarence H. Beck has joined Lockheed's Missile System division as a design specialist in the research laboratory's **flight test electronics** department.

The Air Force has awarded TEMCO Aircraft Corporation a contract which increases by several million dollars its **backlog of orders** for North American F-100 "Super Sabre" pylon assemblies.

Lt. Col. Slattery of CAP Resumes CAB Info Post

The Civil Aeronautics Board has recalled Edward E. Slattery, Jr., from a special assignment in the CAB Bureau of Safety Investigation to head the Board's informational activities.

At the same time, the Board announced the resignation of Roderick Kreger, Chief of the Office of Congressional Liaison and Public Information.

Mr. Slattery, a Federal career employee, served as Chief of Public Information of the Board from August 1942 through March 1956, when he was transferred to the Bureau of Safety Investigation.

During his 14 years as CAB Chief of Public Information, Mr. Slattery has represented the Board on many special assignments, such as Information Director to the Air Coordinating Committee, Director of Information for the President's Special Board of Inquiry on Air Safety, and as CAB Member of the Personal Flying Committee of the President's Air Transport Mobilization Survey. He has been Chairman of the National Public Relations Committee of the Civil Air Patrol, official auxiliary of the U. S. Air Force since 1952, and holds the rank of Lieutenant Colonel-Pilot in that organization.

The author of many authoritative articles on civil aviation subjects, Slattery is also a Director of the National Aviation Club, a member of the Aviation Writers' Association, the National Press Club of Washington, D. C., and past president of the Aero Club of Washington. Active in private flying, Mr. Slattery holds currently effective Airman and Radio Certificates and owns and pilots his own airplane.

each type will be as great as possible.

"This plan for the procurement of new aircraft was the result of intensive study by the Department of the Air Force to determine the best way to shorten the development cycle and ensure as great a performance gain as possible in the production of new aircraft.

"This plan will result in obtaining for the Air Force the most advanced aircraft possible in the shortest time and at the lowest over-all cost in effort and money."

Phase I has now been completed, with the Martin Company successful.

Reforms Urged For Military Procurement At Communications-Electronics Meeting

BOSTON, MASS.

A forum on Military-Business Relations conducted here on 25 May by the Armed Forces Communications and Electronic Association heard a top industry official lambast present procurement procedures throughout the Defense Department.

Mr. Frederick R. Lack, Western Electric Company Vice President, charged that the present set-up is jeopardizing national defense. He outlined a series of steps that should be taken to obtain a "real program of house cleaning."

As was the case with the Forum on Research (see adjacent story), the Military-Business Relations sessions evoked forthright discussion from the speakers and from AFCEA members.

MAJ. GEN. J. O'CONNELL, USA, Chief Signal Officer, outlined the Army's increased use of electronics in connection with employment of missiles, nuclear weapons, new battlefield surveillance techniques, expanded aviation and development of rapid supply discipline.

The Army's top communicator related how the use of electronic equipment will drastically reduce the time required to move Army supplies from depots to users.

He said that it should be possible for field commanders to cut from 90 days to 20 days the amount of stock they must have on hand, as a result of improved communications techniques.

SPEAKING FOR THE NAVY, VAdm. Edward W. Clepton, USN, Chief of Naval Material, said that heavy requirements for electronic gear are being generated by the Navy's "technological revolution" in moving from steam to nuclear power from rifled guns to missiles and from subsonic to supersonic aircraft.

He outlined steps which the Navy is taking to broaden the electronics base by assisting small manufacturers.

MAJ. GEN. THOMAS P. GERRITY, USAF, Assistant for Production Program, Deputy C-of-S, Materiel, revealed that the Air Force is being hurt by prospective loss during the next two years of 42 per cent of its skilled electronic personnel.

Citing other problems which face the Services, General Gerrity reported that development problems have forced delays in electronics equipment programs. He noted that of the amount programmed for FY '55, only 72 per cent was obligated as of the start of April, 1956—nine months after the end of the fiscal year.

He said that as a consequence of development difficulties the deliveries of major electronics equipment for the calendar year 1955 were only 80 per cent of the dollar value of scheduled production.

As was done by all military speakers at the AFCEA sessions, General Gerrity hammered on the need for greater gains in simplicity and reliability, pointing out that the heavy turnover of manpower makes this progress even more essential than if the Air Force could count on stability of service among its technicians.

THE INDUSTRY SPOKESMAN was Mr. Lack.

Pulling no punches, he asserted that "in recent years little or nothing has been done to make participation in government business attractive. On the contrary," he told the meeting, "doing government business . . . is surrounded by so many restrictions and red tape that many companies with other commercial business stay in government business for patriotic reasons only."

He termed this a "serious situation" and said that the relationship between the government and its contractors has departed from the customer-supplier relationship in industry for these reasons:

1. Special restrictions imposed by hundreds of statutes.
2. Thousands of regulations, directives, bulletins and manuals promulgated by executive bureaus.
3. Devotion to procurement procedures rather than policies including the failure to invest contracting officers with authority and discretion commensurate with their responsibilities.

4. Distrust and suspicion of industry, with the predisposition to class all contractors on the level of the worst scoundrel with whom the government may have done business.

5. Attempted exercise of managerial control by the government over its contractors.

Mr. Lack was careful to stress that he was not directing his remarks at contracting officers, whom he termed "the most conscientious, overworked and underpaid group with whom I have ever done business. My quarrel," he said, "is with the people who set up procedures instead of policies. The people who write the 'thou shalt not' directives. The demagogues who want to use military procurement for political and social objectives."

He said the following actions are needed:

1. The government should abandon efforts to exercise more and more control over its contractors and to interfere with their methods of doing business.

a. Reestablish profitable industry operations as a criterion for successful procurement.

b. Let the contractor select his own sub-contractors, and eliminate government dictation of the terms upon which business shall be subcontracted; whether such dictation be cloaked in the guise of price approvals, distressed labor areas, patent policy, or social and political considerations.

c. The powers vested in procurement officials under the headings of renegotiation, re-determination, audit, etc., offer a handy method of exercising management or financial controls. Let the exercise of such powers end with the accomplishment of the functions for which they were designed.

2. The government should delegate authority to contracting officers consistent with the responsibilities assigned to them.

a. Reduce the number of clearances required within an agency or bureau in order to place a contract. This should include a reexamination of the part played in some agencies by review authorities who exercise plenary authority over procurement terms without ever meeting the contractor's representative or understanding his problem.

b. Let the contracting officer exercise his judgment and experience within the framework of basic policies. Organize government procurement offices more in line with the purchasing departments of private business.

c. Improve the caliber and efficiency of personnel engaged in government procurement. The rotation system used for officer personnel may be unexcelled as a military training device, but it is an invention of the devil as a procurement practice. Below the officer level there should be employees of high caliber. Higher salaries should be paid, if necessary, to attract them.

3. Reevaluate and revise the entire structure of procurement regulations, directives, bulletins, manuals, etc., to accomplish the following objectives:

a. The elimination of duplications, conflicts and suffocating details which serve only to stultify the judgment and initiative of contracting officers and erode the efficiency, ingenuity and incentive of contractors.

b. Provide standards and guides consistent with the true function of procurement, but omit all matter irrelevant and extraneous to that function.

c. Extend the practice of consulting with industry concerning additions and revisions to procurement policies.

4. Abandon the policy of requiring uniformity in the treatment of all contractors (not to be confused with equality of opportunity). The government should recognize integrity and reward merit—just as private business does. Superior performance should be given tangible recognition in the form of higher profit allowances or preference in placing contracts.

Institute Of Military Law Offers Prize

The Institute of Military Law's first annual prize—a Certificate of Merit and \$50—will be awarded in 1957 for an outstanding article contributing to professional thought on some phase of military law published during this calendar year.

In addition, the Institute will award three Certificates of Honorable Mention.

The competition may be entered by submitting a copy of a published article to the Annual Award Committee, Institute of Military Law, Office of the Judge Advocate General, Army Department, Washington 25, D. C. There are no length requirements. Submitted articles must deal directly with military justice, military affairs, procurement or some other aspect of military law.

Army Names 103 Lts For RA Commissions

A total of 103 2d Lieutenants and 1st
Lieutenants who have been serving on
active duty have been selected for ap-
pointment in the Regular Army. Ap-
pointments are subject to Presidential
nomination and Senate confirmation.

This program for appointment in the
Regular Army is for Reserve and Na-
tional Guard officers on active duty, with
selections made primarily on the basis of
proven individual efficiency.

Selections were achieved through
participation in the November-December,
1955, application period.

Applications are currently being ac-
cepted under this program for the May-
June 1956 application period.

Following are the officers selected for
appointment (all are now serving as first
lieutenants unless otherwise indicated).

Ackerman, David G. McMahon, Patrick B.
Allen, Vincent H., jr. Merrill, William L.
Baldwin, Jessie E. Merrick, Philip B.
Beaube, George P. Meyer, F F, jr.
Bills, Joe Capt Michel, W E
Blizzard, Trevelyn G. Miller, David C.
Bockman, Leonard I. Moffett, Norman A.
Brakenridge, E K, jr. Myers, Lawrence S.
Brown, Thomas R., jr. Olson, Arthur G.
Burnett, Otis E. Osborn, George K, III
Burt, Donald L. Palermo, Frank J, jr.
Butler, Elbert L., jr. Palmer, George E.
Butterworth, J R Pedersen, Alfred L.
Cleary, Arthur C. Phillips, Shepperd H.
Conway, Donald J. Capt Pritchett, R G
Easton, Byron S. Puckhaber, H F, jr.
Capt Eastwood, C M, Ragains, Robert L.
jr. Reade, John C, jr.
Elliott, Robert H., jr. Rodriguez, Joseph C.
Elmore, Donald J. Rogers, Roland B.
Engram, Edwin J. Capt Rolya, W I
Erickson, Eric A, jr. Routon, Lewis A.
Esplin, Willard B. Rundell, Walter, jr.
Fox, John G. Schultz, Reed S.
Gardner, Morris L. Sherry, Roy E.
Capt George, John F. Sleeper, Julian R.
Gerard, Robert J. Smith, John A.
Capt Gittleman, W E Smith, William D.
Green, David E. Specker, Robert W.
Greer, Richard B. Spry, Alfred E.
Capt Hayden, C W Stevenson, Thomas A.
Hembree, Jack E. Stevenson, William J.
Higgins, Alan R. Stidham, James A.
Hoffman, William J. Strawn, W M, jr.
Husa, Richard F. Suess, Philip M, jr.
Hyde, Richard G. Tourtellott, R J.
Irvin, Matthew W. 2d Lt Tummler, Dana
Johnson, Robert R. Ulrich, Charles F.
Jones, Glenn W. Vldrick, Robert L.
Jongebloed, N H Wagers, Robert W.
Capt Keller, G A Wall, Frank B, jr.
Kinney, Philip R. Wallace, Robert G.
Capt Kotite, R S Watson, Richard W.
Kyburz, Edward P. Wheeler, W C, jr.
Lancaster, William A. Whelan, William E.
Logan, Donald G. White, Jocelyn A.
Capt MacMillan, W D Wight, Jerry B.
Madigan, John J, III Willey, Oliver A, jr.
Matson, Hugo W. Williams, Roy L.
May, Edwin M, jr. Williams, L A.
McIntyre, L A. Williams, Roy L, jr.
McLaughlin, T J Wilson, Parks W, jr.

Noted Judges View

Interservice Photos

Three noted photography experts will
judge the Sixth Annual Interservice
Photography Contest.

They are Jacob Deschin, Camera Edi-
tor, New York Times; Arthur E. Scott,
International News Photos, Washington,
D. C., and Maurice Johnson, Bureau Man-
ager, International News Service, Wash-
ington, D. C.

Judging will be held in the Pentagon
on 6 June. Entries will be exhibited on
the Pentagon Concourse from 17 to 19
July.

Appropriate prizes will be awarded to
each of 12 winners with a trophy for the
most popular entry. The most popu-
lar entry will be chosen by public ballot.
The Perpetual Interservice Photography
Contest Trophy—donated by THE JOUR-
NAL—will be awarded to the service with
the largest number of winning entries.

Entries will be in three categories:
Category I, single black and white en-
largements; Category II, black and white
picture stories; and Category III, color
transparencies.

Kansas To Arabia

Maj. Raymond C. Hesterberg, USAF,
former assistant wing personnel officer
at McConnell AFB, Kans., has departed
for Saudi Arabia as an instructor in the
training mission. His wife, Cecilia, and
their children are traveling with him.

U. S. COAST GUARD

Secretary of The Treasury—George M. Humphrey
Commandant—Vice Adm. Alfred C. Richmond

THE Senate has confirmed the nomina-
tion of Capt. Joseph A. Kerrins, USCG,
for permanent two-star rank.

Captain Kerrins, currently serving as
Chief of Staff, 12th CG District, San Fran-
cisco, Calif., is slated to take command
of the Eighth CG District, New Orleans,
La., in August.

Seeks Retirement Funds

A supplemental request for \$425,000 for
retired pay in fiscal year 1957 has been
submitted to Congress by the Treasury
Department.

The amount, if approved, will permit
voluntary retirements of eligible officers
and men during FY '57.

The retirement section of the appropria-
tion bill was cut back by Congress, forcing
the Coast Guard to defer voluntary 20-
year retirements originally planned. The
pending supplemental funds will permit
full reinstatement of the program.

Issues Code Cards

Coast Guard Headquarters has printed
the Code of Conduct for Members of the
Armed Forces of the United States on
small, billfold sized cards and is making
distribution to each District office and
Headquarters unit.

Commanding officers, Headquarters
says, are to insure that each member of
their command receives one of the cards.
It is intended that each individual carry
the card and use it as a study aid in mem-
orizing the Code. Commanding officers and
officers-in-charge are encouraged by
Headquarters to require memorization of
the Code by all hands as a means to a
better understanding of its principles.

In addition to the initial distribution,
a sufficient number of the cards will be
sent to the Academy and the Receiving
Centers at Cape May and Alameda for
issuance to new cadets, officer candidates
and recruits as they enter the service.

Fitness Reports Due

Headquarters calls attention to the
fact that approximately 1,200 officers have
failed to submit their Fitness Reports.

They are "to do so at once," Headquar-
ters commands, pointing to Personnel In-
struction No. 34-55, paragraph 9 (a).

The Fitness Reports are due for the pe-
riod 1 Oct. 55 to 31 March 56.

Appointments

President Eisenhower has appointed
two Regular and 25 Reserve officers to the
temporary rank of lieutenant (jg) effec-
tive from 10 June.

In addition to Harry W. Perdue and
Bill M. Aldridge, both Regulars, the fol-
lowing Reservists were named:

Kislik, Louis A. Gould, Douglas L.
Gregory, Edw D, jr. McNeill, John H.
Kolb, Robert R. Rubatino, Edw C.
Sarazen, John C. Vellanti, Thos A.
Metzger, Jerome F. Smith, Richard J.
Weissberg, Byron G. Thompson, Alan R.
Stotz, Wm F, jr. Waram, Harold F.
Gibson, Henry J, jr. Somerville, Gordon R.
Wright, Joseph A, jr. Grozier, Richard, jr.
Warfield, Thos H. Chilton, Thos H.
Hermann, Richard C. Lynes, Robt C.
Waters, Gene T. Weinstein, Marvin
Hurwitz, Robt M

At the same time, Treasury Secretary
George M. Humphrey appointed 36 en-
listed men to the grade of warrant offi-
cer, W-1.

They are:

Stange, Carl D. Avila, James P.
Dickinson, Wm T. O'Neal, Maltire N.
Surgess, Starr C. French, Chas E.
DuChene, Harold A C. Monty, Frank H.
Wright, Frank B. Mathews, George
O'Connell, Michael Williams, Raymond L.
Flynn, John A. Kane, James R.
Kolb, Alfred A. Hushion, Thos J.
Gossen, Emmett Malaussena, Robt
Smith, Chas R. Holden, Chas E.
Miller, Frank P, jr. Boles, Earl A.
Gunson, John J. Mauldin, James M.
Myers, Arthur F. Ginn, Marvin E.
Olson, Raymond W. Scholz, Gustave F.
Ehrman, Geo F W. Gates, Norman L.
Trimnell, Edmund J. Trevelt, Raymond H.
Needles, Roy E. Griffiths, Chas W.
Schuttpelz, Paul, jr. Knapp, Geo A

ASSIGNMENT CHANGES

Captain T. Wachusett, to Hq, Chief,

No Branch Has "Divine Right" To Monopoly On Flying Machine, General Hutton Asserts

PALO ALTO, CALIF.

The Army must have the mobility of aviation if it is to work effectively in joint strategy with the Navy and the Air Force, Brig. Gen. Carl I. Hutton, USA, Commandant of the Army Aviation Center, Ft. Rucker, Ala., declared in a talk given to members of the Aviation Writers Association visiting the Hiller Helicopter plant here on 28 May.

B/Gen. Hutton

Recalling a statement of a visiting British Army officer that the U. S. Army has more airplanes than the Royal Air Force, General Hutton asserted that Army aviation is "just in its infancy" and is just beginning to pick up impetus under "the vigorous leadership of such people as General Taylor, General Gavin, and General Howze."

General Maxwell D. Taylor, USA, is Chief of Staff of the Army; Lt. Gen. James M. Gavin, USA, is Chief of Research and Development, and Maj. Gen. Hamilton H. Howze, USA, is Director of Army Aviation.

General Hutton blasted at the theory that everything that walks belongs to the Army, that swims belongs to the Navy, and that flies belongs to the Air Force. "This is an extremely short-sighted view," he said. "What we really need are land, sea and air forces organized,

equipped and trained to fight together to win the war, and each of the forces must have whatever is necessary to make it capable of participating in the overall campaign."

General Hutton denied that the Army is trying to create another Air Force. What it is striving to do, he said, is to provide the soldier with the necessary equipment and weapons to win the land battle. He added that he cannot "subscribe to any policy which says he may not have what he needs."

Continuing, General Hutton said: "Army aviation today is based upon the premise that aircraft can and should be included organically with Army formations. In this day, you do not need a superman in super organization for airplanes. We have them in Artillery, Infantry, Armor, Signal, Engineer and Medical units and they are supported by a logistical organization in the Transportation Corps."

"There are those in Army aviation who insist that the Army must have an aviation branch. There certainly may be a requirement for personnel who devote their entire careers to aviation matters. In the longer view, however, just as we must argue that the Air Force has no divine right to a monopoly of flying machines, just because they fly, it is also obvious that an aviation branch in the Army should have no monopoly on flying machines for any similar reason."

"In other words, the ideal toward which I believe we should move is maximum capitalization within the Army units themselves upon the characteristics, capabilities and utility of flying machines in general. There is no need for the soldier to walk at a mile and a half an hour across country if there is a requirement for faster movement over greater distances. Flying training and flying techniques are no longer superhuman, esoteric, or mystical."

In introducing General Hutton, Mr. Stanley Hiller, Jr., of Hiller Helicopters, said that although his firm comes under Navy recognition, it is run principally for the Army. Mr. Hiller pointed out that the Army now has twice as many helicopters in terms of pounds of weight, as the Navy and the Air Force combined. In fact, he said, the Army really controls the destiny of the helicopter industry.

The Army, he said, has not been given its proper credit for what it is doing in the air. His firm alone, which now has 900 employees, has manufactured 750 helicopters to date, the vast majority of which have been for the Army.

The famous "Flying Platform" with its ducted fan, Mr. Hiller said, will be produced in limited numbers for field evaluation by the Army. His firm, he said, is engaged in 14 different projects, the majority of which are not conventional helicopters and the majority of which are for the Army.

The Army, General Hutton said, must have the movement necessary to exploit the firepower of the Air Force, which, he contended, utilizes fire power alone.

General Hutton recalled that some of the news magazines have quoted President Eisenhower as saying, when he was Chief of Staff, that the Army's place is on the ground.

"My answer to this," General Hutton declared, "is that the statement was made about ten years ago before the implications of helicopters, convertiplanes, STOP and VTOL aircraft had been assessed. I am not at all sure that President Eisenhower would say the same today if he were in a position to be familiar with recent thought and developments."

Navy Research Office Lets Army Plane Award

A \$850,000 Army contract for the design and development of a flying test bed, "tilt wing" turbine-powered vertical takeoff and landing (VTOL) aircraft has been awarded by the Office of Naval Research to the Vertol Aircraft Corporation.

Utilization of the flying test bed approach in designing the VTOL aircraft

CARTER L. BURGESS (center), Assistant Secretary of Defense, manpower and personnel, chats with Maj. Gen. Milton G. Baker (right), Superintendent of Valley Forge Military Academy, and chairman of the Reserve Forces Policy Board, and Maj. Gen. Anthony J. Drexel Biddle, Adjutant General of Pennsylvania, prior to the Armed Forces Day parade in Philadelphia.

Legislative Calendar

Approved By Senate

FAMILY MEDI-CARE—HR 9429, authorizes improved program of family medical care for the Armed Services, including a medical care insurance program providing for hospitalization in civilian facilities. Approved Conference report and returned bill to House.

MILITARY PERSONNEL CLAIMS—HR 3996, Senate adopted conference report on HR 3996 to amend Military Personnel Claims Act of 1945 and sent measure to White House.

MILITARY FAMILY HOUSING—S. 3855, authorizes an additional 200,000 units of family housing for military families. Sent measure to House.

Approved By House

FAMILY MEDI-CARE—HR 9429, authorizing improved program of family medical care for the Armed Services, including a medical care insurance program providing for hospitalization in civilian facilities. Approved Conference report and sent measure to White House.

CITADEL TANKS AND GUNS—HJRes 261, authorizes SecArmy to make donations of obsolete tanks and guns to The Citadel, Charleston, S. C.

WIDOWS PENSIONS—HR 10542, liberalizes certain criteria for determining eligibility of widows for benefits.

Introduced In House

UNUSED LEAVE—HR 11385, Rep. Vinson (D-Ga.), validates certain payments in settlement of unused accrued leave heretofore or hereafter made to certain members of the Army and AF.

UNDER SEC DEF—HR 11386, Rep. Vinson (D-Ga.), amends National Security Act of 1947 to establish an office of Under Secretary of Defense for International Security Affairs.

USCG TEMP PROMOTIONS—HR 11402, Rep. Bonner (D-NC), extends existing application of Temporary Promotion Act of 1941.

Introduced In Senate

PAY CREDIT FOR EM—S 3930, Sen. Langer (R-ND), authorizes certain enlisted personnel retired with less than 30 years' service to credit for retirement pay purposes all service credited for longevity pay purposes.
